Board Member	Agenda Item	Question	Response
La Forte	Consent Agenda	Resource Synergy Contract is $136,393.20 for waste sensors. Have we ever done a look-back to see if this saves money? The company website indicates that it can save a district 10-15%, which made me wonder, how much has it saved the district since the sensors were placed?	Resource Synergy has identified approximately $116,500 in overbilling (savings from Q1 2022 through Q1 2024) that the District has actively worked with our waste haulers to refund to PPS in credits. Additionally, the benefit is that PPS, as an organization, is reducing our carbon footprint by only having our haulers address pick-ups when they are necessary rather than emptying empty containers. We continue to work with Resource Synergy on savings and right-sizing our waste containers for efficiency.
La Forte	Consent Agenda	ETR Health Smart Digital Contract: Why did we opt out of Middle School Sexual Health Curriculum? Is it covered in other curriculum?	
La Forte	Consent Agenda	Multco PFA: This is a great program and revenue stream for the District. It's a fantastic way to introduce neighborhood families to their schools before kindergarten. Have there been any conversations about expanding this to all PPS elementary schools?	We agree that Preschool for All is a great revenue stream and partnership. Since PFA's inception, PPS has integrated an increasing number of PFA seats into our braided early learners' program each year. In this coming school year 2026-27, 273 of our 901 PPS PreK seats will be funded by PFA. We also welcome priority partners who are funded by PFA into our space to increase capacity (e.g. CAIRO, MECP, Albina Early Head Start, etc). While the goal of adding PFA classrooms to every PPS elementary school is unlikely - as that would not necessarily align with the vision of a mixed delivery model of PFA - we will continue to strategically expand our partnership with PFA

			as district funding, capacity, enrollment, and community needs allow.
Engelsman	Consent Agenda	PS98109, how is this different than the contract we approved in June for temporary staffing for IT services, and why do we need another $600,000?	This was answered in the board meeting
Engelsman	Consent Agenda	Re: DR 98148, why are we doing social emotional learning online? (the irony of this is not lost on me) Could you please explain whether this is a new contract or a renewed contract? And if new, why are we doing this online?	The social emotional curricular tool, We Do it for the Culture, is not an online program. We purchased digital licenses for this program, but it is for teacher resources only. This program integrates multimedia into their curriculum, but students are not working independently (or in groups) on their computers. All of the SEL curricula are hands-on and interactive; none of the three programs are virtual programs.
Engelsman	Rightsizing	Could you please ask Dr. Greene (or Margaret or Jon) for the data referenced by Dr. Greene last night when I asked about families leaving PPS during / post-SEGC	The information referenced can be found on pages 48-50 in Domain 2. This secttion reviews the dual language immersion programs specifically. The information looks not only at enrollment in the program after it was relocated but also at enrollment in the district as well. p. 49 shows the summmary graph of the percentage of students leaving the district comparing students enrolled in DLI programs and those not enrolled in DLI. "Taken together, these findings suggest that SEGC-related DLI program relocations did not appear to result in widespread district exit among DLI students." (p.49).
Engelsman	n/a	I'm wondering if you have all made the decision to open boys volleyball up to PIL schools (officially)	We cannot offer any new OSAA sports this year in light of the budget. As a reminder we organized a club league for our schools and other districts and we will continue to utilize this option in the time being until our budget is stabilized enough for us to bring on new OSAA sanctioned sports.

Engelsman	n/a	Where will middle schoolers will run track and field in the spring. I don't have the track / field renovation calendar handy, but when will those renovations start? Is there a way to have them start after track and field ends in the spring, so middle schoolers can still practice there? It is a huge squad as I understand it.	Regarding use of Cleveland Field. The Cleveland field has been off-line since the week of July 27th, with construction starting on the Track and Field Schedule Q2/Q3 2027. Cleveland Youth Track will practice at the Marshall campus. This information was also shared at the FIO meeting in May. Please let me know if you have other questions. https://meetings.boardbook.org/Public/Agenda/915?meeting=747392
Engelsman	Rightsizing	At a recent board meeting, I asked about where answers to the community questions gathered at the 6+ community involvement meetings. I was told answers are in the FAQ section of the rightsizing website. However, at the time (and still now), there are only 6 questions answered, and one of them is a question about teacher furlough days. I know we gathered dozens (at least) of community questions and would like to know when they will all be up and when they will be answered?	We gathered a substantial volume of feedback across the six community meetings, and our team is systematically consolidating and categorizing those questions to ensure every concern is thoroughly addressed. We have recently published an updated batch of answers to the Rightsizing FAQ page, addressing several new topics. Moving forward, we strive to publish weekly updates to the site through this process.
Splitt	Rightsizing	I'm curious how we are tracking new housing in our calculations for future enrollment? Since I live 8 houses from a 250ish house development that hasn't been reflected in enrollment projections, I think of it the 2-4 times a day I wait for a flagger. And if we are able to consider projects completed since 2021 in the building conditions evaluation? I thought that Oregonian list today was really helpful but that it's out of date made me worry we don't have an updated version and will fail to account for recent investments.	Yes, the Population Research Center at PSU does include these in their forecasts as they monitor housing developments. One in particular in the Rieke area was called out in the latest report which is published online.

Engelsman	n/a	I was chatting with a new Ockley Green mom yesterday and she was expressing alarm at getting an invitation to join a "new" school app called Live School Support. The email she received had her son's name and that he was at Ockley Green. She went through the sign up process, thinking this was something all middle schools use. They're a 6th grade family. Once in the app, the platform's face sheet had "merit" and "demerit" points that her child was receiving at school. And it has a behavioral profile. She is absolutely shocked and alarmed and I told her I'd let the district know asap. Keeping track of merit and demerit points of kids seems suspicious to say the least, and once it's on an application, it is there forever. I am hoping you can look into this and advise on its legitimacy.	Thank you for bringing this to our attention. The LiveSchool platform was requested by two middle schools and is presently going through our formal vetting and approval process. This standard evaluation includes a thorough review of student data privacy and software security requirements before any approval decision is made. **It is important to note** that we have multiple instances of principals and teacher purcashing unvetted and unapproved applications. Central office teams only find out after the fact.
Engelsman	Rightsizing	Could you please provide data on the number of kids vs. enrollment? Are the number of kids truly declining or just enrollment at PPS because parents are making other choices because of unsafe/large classrooms?	Our research does not support the premise that parents are not choosing PPS due to "large/unsafe" classrooms. Here are the results of our study about why families leave: PPS-Why They Stay and Leave - Summary Report - Ja… Regarding enrollment, PPS enrollment has been declining since the 18-19 school year. Several factors are impacting our enrollment: Catchment percentages are lower, birth rates continue to decline, and fewer families are moving into Portland since the pandemic and those families are not having children or bringing school-aged children to Portland. Neighborhood catchment rates are published on our website:

			https://www.pps.net/fs/resource-manager/view/d65fc69c-e9b5-4c13-8199-545d12deb541
Engelsman	Rightsizing	As we begin our right-sizing conversation, could you please provide me with the testing data (math, ELA, etc.) for the schools that are under 300, over the last few years (maybe since the year before COVID since that is when this downward enrollment trend gained speed).	We have created a public dashboard and within it, developed an OSAS/Enrollment tab to see the relationship between school size and enrollment. At this time, no relationship is noted. Here is the link to the dashboard: https://www.pps.net/departments/dataaccountability/data-and-accountability/data-strategy-and-insights/academic-portal
Engelsman	Rightsizing	(1) what is the estimated cost savings to closing a school? (2) how many lay offs are anticipated with each school closing? I realize there is nuance to this as not all positions at a closed school will be eliminated, and some positions may move to a new location. So I guess I am asking for the general estimated loss, taking the nuance into consideration.	2. The number of potential layoffs can not be determined at this time. What we do know is that school consolidations will results in fewer school based staff members, from the custodians to the building leaders. The most impacted positions are those where there is one per building, such as a principal, custodian, possibly a school counselor, etc.
Sullivan	Transportation issue	I have received an email from a West Sylvan parent about the persistent delays in getting to school because of train hold-ups. She says that the West Sylvan community has been trying to resolve the problem for years.	We have connected the parent with Brandon Coonrod.

Engelsman	Rightsizing	what does it look like if we were to have supply (of focus option schools) meet demand (so no waitlists)	Broadly, if you wanted everybody who asked for a focus option and did not get an offer you would add kindergarten sections at Winterhaven and Sunnyside, 6th grade sections at da Vinci and 9th grade sections at Benson. We are meeting demand for all dual language immersion languages except Spanish. If additional sections were added at Ainsworth, Beach and/or Atkinson, the programs would no longer conform to the two-way immersion model because the waitlists consist of English and Heritage speakers only, not native speakers. There are just under 600 students who are currently on a waitlist for a focus option or dual language immersion programs.
Engelsman	Rightsizing	where are people going? I am looking specifically for data on where people went after we closed or consolidated schools. Specific examples could be: ** when we closed Marshall, how many families left PPS but remained within PPS boundaries? ** same for Edwards - when that was closed 20 years ago, how many families left instead of going to Sunnyside/Abernethy/Buckman? **And most recently, when Bridger was consolidated, I'd love to see numbers of class sizes over the last couple of years.Specifically, after merger, how many 1st grade families who became the next year's 2nd grade families left and where did they go? I'd love that info for each grade level as they progressed to the next year. I've asked for this before, so apologies if this has been answered. If it has been answered, please point me to where it is.	It would take significant effort to answer this question about the student movement from the closure of Marshall fifteen years ago and Edwards twenty years ago. We are also looking at something like this districtwide. Overall metrics indicate that while building retention dropped during consolidation, district retention remained stable at over 93%, showing that the majority of departing families transferred to other schools within PPS rather than exiting the district.

Sullivan	Rightsizing	I have received an email from a West Sylvan parent about the persistent delays in getting to school because of train hold-ups. She says that the West Sylvan community has been trying to resolve the problem for years but that PPS has done nothing. I know that you worked wonders with the Access bus situation, and I hope that you can do something similar with this problem. Please let me know if you can meet with me and/or the parent who is trying to find a solution. You may have heard about this already from Rosanne, so you may be working on it already. Please keep me posted.	We have connected the parent with Brandon Coonrod.
Engelsman	Rightsizing	are we rightsizing the large elementary schools, too? I ask because in 2019-20, before the pandemic, Abernethy was overcrowded (over 550 students) and the kindergarten classrooms each had 29-30 kids in them and kids were in overflow buildings that were condemned three years ago and finally torn down last year. It was a beast of a school so more was not necessarily better. (I specifically heard this question asked at the Wells engagement session so it got me thinking)	We are defining sustainable schools as an elementary school with stable enrollment of 360 or more. An elementary school with 500 or more students would fall into this category of stable school.
Engelsman	Rightsizing	how many empty buildings does PPS own and how much does it cost, per year, to maintain them. what will happen to the closed schools?	We only have two vacant buildings: Kenton and Smith. Kenton is being short term leased, and is being evaluated as a potential swing space for students while their building is undergoing seismic retrofits. Smith's annual cost was approximately $70,000, including insurance costs. Future use of any closed school is still to be determined. Closure does not automatically mean that a property will be

			sold or disposed of. As part of implementation planning, staff will develop a comprehensive building repurposing plan that includes community engagement and aligns with applicable board policy and administrative directives governing the future use or disposition of district property.
Engelsman	Rightsizing	For right sizing, will there be a commitment to do more than the bare minimum staffing? We can't close schools only to offer people what they have in their small school now. We need to offer MORE to incentivize! so ... (6a) what exactly will we offer?	There will be a commitment to shift as many schools as possible toward the programmatic components of the well-resourced schools framework, as described on the “hypothetical future state” slides at the TLE Committee (see below). That said, it is important to note that, given our looming budget deficit, if we do nothing, all schools will continue to experience the types of challenges described on the “current state” slides in the TLE Committee presentation--and, that current state will likely get worse (e.g. more blended classrooms, possibility of shared or split administrators, less likelihood of all students receiving all core enrichment programs, etc). It is important to understand that our current staffing model is the status quo. In order to offer more, the status quo would not be able to stay the same.
Engelsman	Rightsizing	for neighborhood schools, which are losing kids to lottery schools, will we make a commitment to offer more to them? So for families who choose a focus option / lotter / DLI program, they get the *extra* that's offered at that focus option school. But how about we offer extremely small classrooms and something like a language special starting in kindergarten at all the neighborhood schools. We have got to focus on the beautiful neighborhood schools and elevate them!	As directed by the Board, we are working to stabilize neighborhood schools, while also maintaining some choices for families. Rightsizing will allow us to ensure that our neighborhood and focus programs have the staffing and resources they need to offer a well-rounded and comprehensive academic and enrichment program. Because we are still facing an impending budget gap, we are not in a position to consider new programming (e.g. elementary language courses) at this time.

Engelsman	Rightsizing	**** like we did for Jefferson ***** can we draw boundaries of maybe 1 mile around elementary schools? I suspect there are a lot of families who live further from the school they attend than other schools. My family as an example: we live 1.1 miles from Abernethy, which means we get a yellow bus route option (costs money). But we live .6 from Sunnyside and .6 from Richmond. If either of those were our neighborhood school, PPS would save money because there wouldn't be a yellow bus cost associated. I am certain this happens at a lot of other schools, so can we please take a look at what happens if we draw boundaries of 1 mile around elementary schools? (there is a Creston family who lives directly across from Richmond)	Yes, We will share similar visuals showing the density of students from elementary, K8 and middle schools with circles indicating a one mile (elementary) and 1.5 mile (for middle schools) radius. The Cleveland/Franklin region in Portland has the highest number of schools. This means that they are close to each other and when we have focus option schools or programs next to neighborhood schools, the neighborhood attendance area may have the focus option school within it.
Engelsman	Rightsizing	or the neighborhood school model, which we hear mostly bad things about, will we be reconsidering those models and making sure to properly staff them so the program succeeds? And will we commit to no further such schools until the ones in the model are thriving?	The Special Education department is currently drafting a response to this.

Engelsman	Rightsizing	How does PPS define “functional capacity” versus “building capacity” when calculating utilization? What utilization percentage is considered “efficient” or appropriate, and what standards or research inform that threshold? Are any equity considerations or adjustments applied to this calculation, particularly for Title I schools or schools serving higher-need populations?	Functional capacity is a practical estimate of the number of students a school site can accommodate. PPS calculates it as a model based on the capacity of each classroom which is determined by its size in square feet and the approximate percentage of a school day that the instructional spaces are used. The utilization rate identifies how much of the gross capacity is being used. Most schools do not use 100 percent of the available student capacity in the building every period of every day. Gross capacity is based on the capacity of each classroom (Classrooms less than 800 SF have a student capacity of 24; classrooms greater than 800 SF and less than 1,000 SF have a student capacity of 27; classrooms greater than 1,000 SF have a student capacity of 30.). PPS defines Efficient Utilization as a school operating between 70% and 100% of its Functional Capacity. Schools operating within this range generally align student enrollment with available physical footprint. This baseline generally supports the education program while maintaining room flexibility for dedicated health services, early childhood programs, and community partnerships. K-5 and K-8 schools have a base utilization rate set to 100%, then scheduling complexities are acknowledged with utilization rate reductions for: Title I TSI or CSI neighborhood K-8 (not a focus option) Co-located neighborhood and immersion programs

			In addition, classroom counts are reduced for non-homeroom classrooms. These include: Computer labs Gymnasiums One Special Ed Learning Center One or two Art/Music rooms, depending on enrollment formula Early Childhood Leased spaces
Engelsman	Rightsizing	FAQs? They appear to not have been updated since April and there are only 6 FAQs but really only 5 because one of them is about the furlough days. We likely got hundreds of questions from community members. When will they be pulled and posted and answered?	New FAQs are being added today and will be updated weekly.
Engelsman	Rightsizing	keep referencing 360 and 500, presume from Dr. Green's report and the QEM. But no mention of average class sizes. In Dr. Green's report, taken from the QEM, it suggests classroom sizes need to be factored in	We reviewed the methodology suggested by Dr. Green to determine enrollment thresholds for sustainable schools. He suggested we use three frames of reference: peer districts, prototype models (QEM), and local models. These thresholds do not speak to specific class size. “Rather, they should be understood as planning floors that help PPS assess whether schools are likely to remain large enough over time to sustain the staffing, programming, relationships, and student supports associated with well-resourced schools. “ p. 141. Similarly the research on school size has tensions. “The research on school size does not support a simple conclusion that smaller schools are always better or that larger schools are always more efficient. Instead, the literature points to a set of tradeoffs (regarding school size) that PPS must hold together. The research suggests that smaller schools often provide stronger relationships, greater student visibility,

			easier family connection, and more intimate school climates. Larger schools often provide more staffing flexibility, more program breadth, stronger grade-level or subject-area teams, and greater capacity to offer specialists, electives, and intervention support.” p.141
Engelsman	Rightsizing	housing being built around schools (like Creston and Glencoe). Are we considering how those new buildings will affect enrollment in the very near future?	Yes, the Population Research Center at PSU takes into account new housing developments. They model the effects of income restricted housing.
Engelsman	Rightsizing	How will K-8 model come into play? Would PPS close a middle school before converting a K8 to a K5 and moving the 6-8 to a middle school?	School consolidation scenarios are dependent on many regional factors. Each region has separate needs and considerations such as space, geography, programs and number of schools. We are considering all levers for change including program moves, boundary changes, grade level reconfigurations and closures in this process.

Engelsman	Rightsizing	(1) where are people going? I am looking specifically for data on where people went after we closed or consolidated schools. Specific examples could be: ** when we closed Marshall, how many families left PPS but remained within PPS boundaries? ** same for Edwards - when that was closed 20 years ago, how many families left instead of going to Sunnyside/Abernethy/Buckman? **And most recently, when Bridger was consolidated, I'd love to see numbers of class sizes over the last couple of years.Specifically, after merger, how many 1st grade families who became the next year's 2nd grade families left and where did they go? I'd love that info for each grade level as they progressed to the next year. I've asked for this before, so apologies if this has been answered. If it has been answered, please point me to where it is. (2) are we rightsizing the large elementary schools, too? I ask because in 2019-20, before the pandemic, Abernethy was overcrowded (over 550 students) and the kindergarten classrooms each had 29-30 kids in them. It was a beast of a school so more was not necessarily better. (I specifically heard this question asked at the Wells engagement session so it got me thinking) (3) how many empty buildings does PPS own and how much does it cost, per year, to maintain them. (4) what will happen to the closed schools?	This was shared last March.

		(5) ***** how much will we save, per school closed, to close a school? ***** we need to have a number for this, even if it's not a lot. (6) For right sizing, will there be a commitment to do more than the bare minimum staffing? We can't close schools only to offer people what they have in their small school now. We need to offer MORE to incentivize! (6a) what will we offer? (7) for neighborhood schools, which are losing kids to lottery schools, will we make a commitment to offer more to them? So for families who choose a focus option / lotter / DLI program, they get the *extra* that's offered at that focus option school. But how about we offer extremely small classrooms and something like a language special starting in kindergarten at all the neighborhood schools. We have got to focus on the beautiful neighborhood schools and elevate them! (8) ***** like we did for Jefferson ***** can we draw boundaries of maybe 1 mile around elementary schools? I suspect there are a lot of families who live further from the school they attend than another schools. My family as an example: we live 1.1 miles from Abernethy, which means we get a yellow bus route option (costs money). But we live .6 from Sunnyside and .6 fro Richmond. If either of those were our neighborhood school, PPS would save money because there wouldn't be a yellow bus cost associated. I am certain this happens at a lot of other schools, so can we please take a look	

		at what happens if we draw boundaries of 1 mile around elementary schools? (9) for the neighborhood school model, which we hear mostly bad things about, will we be reconsidering those models and making sure to properly staff them so the program succeeds? And will we commit to no further such schools until the ones in the model are thriving?	
Sullivan	Rightsizing	I have received an email from a West Sylvan parent about the persistent delays in getting to school because of train hold-ups. She says that the West Sylvan community has been trying to resolve the problem for years but that PPS has done nothing. I know that you worked wonders with the Access bus situation, and I hope that you can do something similar with this problem. Please let me know if you can meet with me and/or the parent who is trying to find a solution. You may have heard about this already from Rosanne, so you may be working on it already. Please keep me posted.	We have connected the parent with Brandon Coonrod.
Engelsman	Rightsizing	As we begin our right-sizing conversation, could you please provide me with the testing data (math, ELA, etc.) for the schools that are under 300, post COVID?	This public dashboard shows there is no data supporting that smaller schools have higher test scores. Test scores are better predicted by socio-economic status than school size.
Engelsman	Rightsizing	Could you please provide data on the number of kids vs. enrollment? Are the number of kids truly declining or just enrollment at PPS because	Here is the PPS Enrollment Forecast from 2026-27 to 2035-36 from Portland State's Population Research Center. This was updated on July 24, 2026 and provides the source

		parents are making other choices because of unsafe/large classrooms?	enrollment data we are using to analyze enrollment and model.
Engelsman	Rightsizing	I have seen a lot of news recently (likely thanks to AI listening and algorithms) on "what happened 10 years after rightsizing" in districts like Philadelphia and Chicago. Both of those districts closed a large percentage of their schools and the studies now suggest an increase in gun violence around closed schools and that students in "receiving" schools had test scores go down. This is not to mention that families did indeed leave the district. I've included some articles and those articles include studies from Johns Hopkins, University of Chicago and University of Pennsylvania.. So I guess my questions are (1) How do we know we won't have the same outcome, one where no money is saved, student enrollment is lost and communities are shattered? And (2) are we looking nation-wide at how districts have fared post-closure? Chair Wang has casually mentioned "Chicago closes schools all the time" as a good thing, but research suggests that is not quite accurate. Public school closings in Chicago linked to more gun violence in nearby neighborhoods | University of Chicago News Chicago Closed 50 Schools 10 Years Ago. What's Happened Since Then? (I don't know "Block Club Chicago" but quick internet research suggests it is	(1) In the recent changes from the southeast enrollment balancing there was no evidence of differences in student outcomes (discipline, attendance or academics) between students that experienced changes and those who did not. In addition, while there has been an enrollment decline overall in the district, the decline in southeast was not significantly different from the district overall. (2) Yes, we're learning from rightsizing efforts happening in districts across the country, and that includes looking honestly at what went well and what didn't. Some of that research is cautionary, and we're not dismissing it. On student outcomes, what it tells us consistently is that students who attend well-resourced schools — strong academics, stable staffing, student supports, and access to programs — do better. Rightsizing is designed to increase PPS students' access to that, regardless of which building they're in. The June 2026 equity audit from our Southeast Enrollment Balancing effort found no significant negative changes in student outcomes, and modest positive gains for several student groups. That doesn't guarantee every future decision goes the same way, but we're committed to applying those lessons in this work. On site closures: the equity audit recommends that any PPS closure plan include a building disposition plan, a maintenance and security cost estimate, a community reuse process, and a realistic sale/lease/reuse/demolition timeline, decided before closure votes, not after. Future use of any

		a hyper-local neighborhood-focused newsroom in Chicago) 17 Philadelphia schools closing in 2027: What to know - WHYY with a link to a 2019 study out of the University of Pennsylvania: "A 2019 study from the University of Pennsylvania found that following these closures, displaced students received more suspensions and were absent more compared to their peers."	closed school is still to be determined — closure does not automatically mean a property will be sold or disposed of. As part of implementation planning, staff will develop a comprehensive building repurposing plan that includes community engagement and aligns with applicable Board policy and administrative directives governing the future use or disposition of district property.
Engelsman	n/a	Has a porta-potty been installed (PTA Clothing Closet)? I keep thinking about the single parent with 2-3 young kids whose kids need the bathroom and the parent is in deep trouble. (I had three under 18 months and potty trained all 3 at once so this fear resonates closely with me)	Spoke with Jo Ann Wadkins and everything is going fine. As of today the Clothes Closet has not installed a portable bathroom but they absolutely can if they feel it is a need.

Chase-Miller	n/a	Can we please fix this restroom issue (PTA Clothing Closet) ? My understanding is that there's a bathroom that locks with a key right across from the clothing closet, and that using it does not put visitors in the path of kids. We have to support the dignity of the folks using the clothing center. They're PPS families and would be able to use the restroom if they were visiting for another purpose.	The Clothes Closet did have more space in previous years when it served as a swing space most recently for Benson. This is because Benson, for the programming that it offered, did not necessitate needing the space. With Cleveland moving over this changed. They will need that space for programming. -The Clothes Closet did move to a different space within Marshall, it is smaller, and we remodeled the space and provided storage. The space does have access to an outer door which allows students and families more privacy and discretion. -Section 4.21 of the lease states: In its use of the Premises, Licensee and its volunteers shall have right to use the Building restroom #A19 immediately across the hall from the Premises. The public shall not have access to restrooms at the Building. Licensee shall be allowed, but not required, to install a Porta Potty at the exterior northwest corner of Space A21 under the terms and conditions as outlined in Exhibit B. -The Staff and volunteers of the Clothing Center will have access to a permanent restroom within the school building. The patrons (public) do not have use of the permanent restroom. This was discussed with the Cleveland Principal and Mary Kane from our legal department, and provides for a safe and secure school building for our Cleveland Students. -Moving forward, we will continue looking at alternative spaces for a more sustainable venue to house the Clothes Closet, and given the rightsizing conversation this will also serve as an opportunity for a more permanent space. Confirmed with Jo Ann Wadkins that the bathroom is accessible to students. The ISC classroom is the closest classroom and that is the bathroom that they use.

Engelsman	Rightsizing	(1) I hear a lot of "we need to make sure all schools are getting art and music and library and PE". Could you please send me a list of schools that are not getting all 4 of these already? And in that list, could you include whether the art/music/PE/library teacher is part or full time? (2) a lot of schools - when 350+ students - are pretty full, almost bursting at the seems. When there are more classes in each grade and more students in the building, are we preparing for: (a) where will these specials live? and (b) will there be enough time in the day / week to schedule each class in each grade for each special? Has this been discussed? Lastly, (3) how are utilization rates being calculated? For example, at Creston, every single classroom in the building is being occupied and most of the classes are at (or above) capacity. But Creston is still showing a low utilization rate. As a follow-up to (3), Creston houses the CRIS program and P4A. Are we factoring in the loss of revenue if that school is closed? Or where those students will go? Are those students being factored into the utilization rate for Creston (or any school that has a P4A or PK program?)?	See answers from 08.31.26 1.) Regardless of building size or split schedules, every student receives 2 days of Arts Programming (typically 1 day of Art and 1 day of Music), 2 days of PE, and 1 day of Library weekly. We have also put together this Overview for K-5 Staffing Models that detail the requirements and allocations of FTE for K-5. 2) Yes. Space for specials and the ability to schedule all students for required programming are part of the school-level operational feasibility review. Specials may occur in classrooms, gymnasiums or other specialized spaces. Many schools within PPS who have greater than 350 students are already successfully scheduling specials for all of their students. The Academics teams will continue to provide scheduling guidance and support to building administrators. 3.+) Utilization compares student enrollment to the building's calculated instructional capacity. The utilization model is a system-level planning measure and may not reflect how individual rooms are currently being used or current class sizes. Specialized and early-learning programs are factored into the utilization rate for each school where such programming occurs. For rightsizing planning, specialized programs are being reviewed separately from general enrollment utilization, including their space requirements, student transition needs, and potential operational or financial impacts. Any scenario

			affecting specialized programs would need to identify where and how they would be accommodated.
Engelsman	Rightsizing	I'm reading through the presentation for tonight and would love for the District to share how many buildings we have in our inventory that have a functional capacity that can support 360 students in grades K-5. Also, I don't see a number in the presentation for the goal enrollment for middle schools. What is that number and how many buildings do we have with a functional capacity that can support that number?	There are no current K-5 buildings with a functional capacity below 360. For K-8s or other configurations - currently, East Sylvan, Skyline, Winterhaven, and Terwilliger sites have functional capacities below 360. Sunnyside is just below 500 around 490. There are no middle schools with a functional capacity under 500. The smallest is Gray with 588 then George at 623.
Engelsman	Rightsizing	Dr. Armstrong was very excited at the start of the 25-26 school year to say how we saw a first-in-a-while uptick in kindergarten enrollment. For the start of this 26-27 school year, for the schools I have been at or talked to families at, it seems we will see *another* uptick. (a) is this accurate? Will we see an enrollment increase? (b) is that being factored into this process?	a) While individual school communities may feel visually full or see small localized entry spikes, our district-wide metrics, tracked against the locked baseline projections established last spring and summer, show a different overall picture: Kindergarten Enrollment: As of today (9/11/2026), Kindergarten enrollment is running 115 students below the baseline projections established last spring/summer, and sits 65 students below last year's counts. Total K–12 Enrollment: Total enrollment is tracking below target with our locked spring/summer baseline (about 200 students below), and is about 700 students below last year's official October counts. (b) These locked spring and summer baseline projections form the foundation of our financial and operational modeling as we evaluate the necessary magnitude of rightsizing. When we look at rightsizing, the goal is not to react to single-year spikes, but to address multi-year structural declines.

Engelsman	Rightsizing	Class size. My kids have been at the larger schools (500+ in kindergarten and 500+ now in middle school) and the class sizes have not been reasonable, they have been huge. And as a result, families have left the district for choice elsewhere. I have anecdotal information I won't type out here, but nowhere in "well resourced schools" did I hear mention of recognizing that class size is critical. Is class size capping part of the conversation at all?	Class size capping is not a part of the rightsizing conversation.
La Forte	Rightsizing	Please provide the underlying data with a list of school sites and the current + projected attendance that make up the total for each school.	Here is historical, current, and projected enrollment by school.
La Forte	Rightsizing	This is a K-8 slide. I don't see comparable slides for K-5 & Middle Schools. Will they be added?	No, this slide accounts for the percentage of focal students in kindergarten through eighth grade across the district. It is not students in K8 schools only.
La Forte	Rightsizing	Please provide actual number of school sites, not just percentages.	K-5 T1 4 out of 22 and then 2 out of 22 K-5 Non T1 8 out of 23 and then 6 out of 23 K-8 T1 1 out of 2 and then 1 out of 2 K-8 Non T1 2 out of 11 and then 1 out of 11 MS T1 2 out of 7 and then 0 out of 7 MS Non T1 4 out of 8 and then 2 out of 8
La Forte	Rightsizing	Please include the number of focal students, not just the percentage, and clearly define who focal students are on this slide. We can't see the scope of the impact without the numbers.	These indicators will be for the scenarios and we will include the number as well as the percentage. Focal students include students experiencing poverty, historically underserved by race, students receiving special education services, and multilingual learners.
La Forte	n/a	can staff please provide tardy data for Cleveland High School students the first 12 days of school this year vs. the first 12 days of school last year? I	Gathering last years tardy for specific points in time is actually not an easy thing to do.

		would like to assess the impact of Cleveland's transportation plan on attendance.	Their attendance overall seems higher than last year at this time, and finding the tardy data is not something we can easily gather at this time.
La Forte	CMGC-Grice-Adair	The Grice-Adair draft findings CMGC memo states "Project budget is expected to be in the range of $60M with Summer 2027 targeted as the approximate start date for project related construction." The total budget for Grice-Adair is $60M inclusive of the building purchase of $16M, leaving $44M for the project budget. Can staff please revise/clarify the memo for Boardbook?	Our intent was to reference the TOTAL amount of the project, not just the construction budget. Total project budget is $60M, minus purchase of property for $16M, leaving $44M for renovations. We estimate the total construction cost to be in the Range of $35-40M.
La Forte	n/a	Was the RFP issue or has the previous construction auditor been engaged?	We are researching prior RFPs and current contracted services for the District to make sure we are not double paying for services. We are meeting this week to determine next steps and map out a timeline which we will communicate with you. For your information, a construction auditor audits the projects within the program (i.e. Monitoring cost controls with the CMGCs). Given we are not to GMP yet on any of our major modernizations we have some time to determine our best course of action.

La Forte and Sullivan	n/a	The Board has received recently from JDLI instructors about the class sizes for Japanese at Grant. Are the numbers below accurate and, if so, is there a plan to add an instructor?	There are two sections of large class sizes. This is the message from the teacher and VP: We are excited to welcome Koichiro Uno to Grant's JDLI program! Koichiro will be volunteering with our 11th- and 12th-grade Japanese classes during Periods 5 and 6, working alongside our students and supporting their continued growth in Japanese language and culture. Koichiro brings extensive experience in Japanese language education and a strong connection to our immersion community. He holds an M.A. in Japanese and an M.Ed. through the International Teacher Education Program at Portland State University. He is currently a Visiting Assistant Professor of Japanese at Willamette University and has also supported students preparing for the AP Japanese Language and Culture Exam through Oya no Kai. Many in our community may already know Koichiro through his work with PPS and Grant. He previously served as a Japanese Language Assistant at Richmond Elementary, has volunteered in Richmond classrooms, and has served as an on-site coordinator for Grant High School's Japan Cultural Trip for the past three summers. We are incredibly fortunate to have someone with Koichiro's experience, knowledge, and longstanding connection to our community volunteering his time with our students. His presence will provide our 11th- and 12th-grade students with another opportunity to strengthen their language skills, deepen their cultural learning, and engage with an experienced Japanese educator. Please join us in giving Koichiro a warm welcome to Grant! We are so glad to have him as part of our JDLI program.

Splitt	n/a	As we are adding the iReady interim assessments, it seems like we are hanging on to others so that at least in middle school math, kids are doing iReady, Synergy, and eventually OSAS. How can we at least keep online testing time where it has been, and not add to it, with the new state requirement? I feel like I understood the plan to be that we'd drop the interim testing we were doing and replace it, rather than double up.	Please see response
Splitt	n/a	I'm constantly hearing that we've increased central office administrators by 79 since 2019. Is this true? If not, what is true or where can I try to track this down?	FY25 Financial Report (pages 142-143) shows staffing FTE by type. This does not include supports that may be provided by a contractor. FTE Type FY25 FY19 Teachers 2,665.7 2,697.3 Ed Assistants 677.4 647.1 School Admin 167.2 165.5 District Admin 4.0 16.0 Other FTE 2,607.5 2,048.1 Total FTE 6,121.8 5,574.0 NOTE: This is FTE for all funds. Student Investment Account and High School Success are funding sources that became available after 2019 and fund many FTE. SJ: As of 10.1.2019 there were 81 central office licensed administrators and senior leadership As of 10.19.2026 there are 77 central office licensed administrators and senior leadership

Splitt	n/a	I heard from a teacher in Zone 1 sharing concerns about e-bikes and e-scooters. Unrelated, our school newsletter this week was included a solid message on this and I wondered if the district might consider a policy in the longer term and a district-wide message in the interim?	HB 4007 - There are a couple of places that talk about ebikes and scooters. Here's PBOT: https://www.portland.gov/transportation/regulatory/escooterpdx?utm_medium=email&utm_source=govdelivery and then some school districts have sent out good stuff too. Here is an example: https://docs.google.com/document/d/1cqPugsawhX5Gd_FQPQKWiAF31M_zDhEccDk-j58kG1g/edit?tab=t.0 Based upon the June legislation. If you scroll down in the link above there's a graphic with ages and what's allowed and not allowed.
La Forte	Bond Update	I'm reviewing the Board meeting materials for Tuesday. Could staff please provide the underlying data and documentation supporting the savings reflected on the slide below, including the methodology used to calculate the $20.8M in "realized savings" and the 225% ROI? I think it's particularly important that we clearly distinguish actual savings from reallocations, negotiated costs, and process efficiencies. If the supporting documentation isn't available, I would recommend removing this slide.	PPS Value Add Register

La Forte	Rightsizing	Do we have an easy-to-read year-over-year capture rate data sheet broken down by school?	We only have In District Capture rate by school which is different from the capture rate in general for the district. This looks at the percentage of PPS students living in a neighborhood boundary that attend their neighborhood school. It does not include students who live in a PPS boundary but attend a non-PPS Charter, private school or are home schooled. This is the most recent for overall from the PRC report - In fall 2025, Portland Public Schools (PPS) enrolled 42,622 students in grades K–12, a decrease of 753 students from fall 2024 and sitting just over 6,000 students below the pre-pandemic baseline of 201920. Post-pandemic trajectories have diverged among individual schools within the PPS system; some have returned to pre-pandemic enrollment patterns, while others continue to experience persistently low enrollment in their neighborhoods. The overall resident capture rate in the district has increased from 74.4% in fall 2019 to an estimated 76.6% in 2025. However, this recent recovery is still 5.6 percentage points lower than the district's previous high of 82.2% in 2015. PRC Report

Engelsman	Rightsizing	I have questions that I wasn't able to ask but thought I'd send through since they're pertinent to the larger conversation: (1) Dr. Armstrong was very excited at the start of the 25-26 school year to say how we saw a first-in-a-while uptick in kindergarten enrollment. For the start of this 26-27 school year, for the schools I have been at or talked to families at, it seems we will see *another* uptick. (a) is this accurate? Will we see an enrollment increase? (b) is that being factored into this process? (2) Class size. My kids have been at the larger schools (500+ in kindergarten and 500+ now in middle school) and the class sizes have not been reasonable, they have been huge. And as a result, families have left the district for choice elsewhere. I have anecdotal information I won't type out here, but nowhere in "well resourced schools" did I hear mention of recognizing that class size is critical. Is class size capping part of the conversation at all? (3) Thank you for explaining how a full time art teacher can weave work into the core classes. I have heard a lot of question about "there simply isn't enough time in a day to give kids art 3-5 times a week. What core class will go if we do that?" So understanding that a well resourced program doesn't necessarily mean more art class minutes but instead means more art throughout the day was helpful to me.	(a) System-Wide Enrollment Reality vs. Localized Impressions While individual school communities may feel visually full or see small localized entry spikes, our district-wide metrics, tracked against the locked baseline projections established last spring and summer, show a different overall picture: Kindergarten Enrollment: As of today (9/11/2026), Kindergarten enrollment is running 115 students below the baseline projections established last spring/summer, and sits 65 students below last year's counts. Total K–12 Enrollment: Total enrollment is tracking below target with our locked spring/summer baseline (about 200 students below), and is about 700 students below last year's official October counts. (b) How Baseline Enrollment Factors Into Rightsizing & Magnitude These locked spring and summer baseline projections form the foundation of our financial and operational modeling as we evaluate the necessary magnitude of rightsizing. When we look at rightsizing, the goal is not to react to single-year spikes, but to address multi-year structural declines. 2. Class size capping is not a part of the rightsizing conversation.

La Forte	Rightsizing	This is similar to the question that I was asking (the associated costs of needed improvements for each building as well). Is there a current existing building condition report? I feel like there is… if there is not, we are going to run into issues with families (and board members 🙋‍♀️) calling out that we haven't taken that data into consideration when we are assessing which buildings to close. Thanks for looking into this.	Yes — we are taking a significant amount of facility data into consideration as part of the Rightsizing analysis, including building condition and reliability, environmental health, life safety, accessibility, educational suitability, safe access to school, functional capacity, and utilization; however, we do not have a single current building-condition report that represents the full analysis that is available for public review. We are intentionally looking at these factors together rather than using a single facility score or data point to determine whether a school should close. The Operations team is also evaluating receiving-school readiness and will complete additional in-person building assessments to identify what investments may be needed. That work will inform the implementation plan and recommendations to the Board about the sequencing and timing of facility investments, as required through Resolution 7307.)
La Forte	n/a	Can staff please provide all existing contracts and amendments for a vendor called Paloma Learning?	Staff sent the contracts to Director La Forte
La Forte	n/a	Is there an updated reconciliation that you can share? It looks like we still have a $6M hole. Is that case? I don't think we can carry over a deficit, can we? What happens if we can't close it? Happy to discuss this if it's easier.	We are still in the year-end reconciliation process. I hope to have an (unaudited) June financial report posted by the end of this month. We asked the board to approve appropriation changes that would allow us to lower the fund balance in June, if necessary. If the final reconciliation is below the 5% target, we will have to adjust the current year resources (beginning fund balance) to match. It will be very close as we watch estimated savings become actuals for the year.

La Forte	Rightsizing	Can staff please provide a spreadsheet or document for every K-5, K-8, and middle school that shows: How many sections there are in each grade band and how many students are in each section. Please call out blended classrooms. I have not sense of how widespread this has become. For each of these schools, please list the following FTE (and any others that may be useful): Librarian, Visual Arts, Music, Band, School Counselor, SPED supports	This is a large spreadsheet that shows the following - Current enrollment for K-5 by school, program and grade level. -125 out of 717 originally allocated K-5 FTE was to blended classrooms. - It is possible that schools allocated equity or other FTE to unblend classes or in some cases blend classrooms depending on how enrollment occurred. - Current student count in classes at the 6-8 level - Staffing allocations made last Spring to schools -Includes Librarian, VIsual Arts, Music and School Counselor on the School Detail for ISR tab -Includes SPED Supports on the SPED tab
Chase-Miller	n/a	I'm so glad that we've been able to resolve the bathroom issue at the PTA Clothing Closet. I want to make sure that the lease is updated to reflect the changes are documented. Who owns that body of work, and is there a timeline for updating the lease? I've had some questions about this from the community.	Staff will update the lease but it will take a few weeks, and will let you know when it is completed.
La Forte	Bond Quarterly Update	Regarding the $20M slide in this week's Board presentation. I've briefly skimmed the spreadsheet that Procedeo provided to Dr. Franco with the underlying data. I haven't reviewed it thoroughly but re: the largest savings of $13M, I'm not seeing the documentation to verify that. Can you please provide that? At face value it looks like a reallocation from the GF to the Bond. Am I wrong about that (entirely possible)?	
Engelsman	Rightsizing	Could you please tell me which school(s) have classrooms of 10 or under kids? And if the	In process

		classroom is 1st grade or above, could you please tell me how many that classroom had the year prior? (i.e. was it exactly as small the year before or did we lose some students?)	
La Forte	n/a	We're getting a couple of waves of emails about the upcoming construction at Wells. The concerns are: Fencing off Wells property during construction Public access to Wells' outdoor facilities once construction is complete Regarding the first, is there a way to preserve public access to at least part of the property during construction? Is completely fencing off the property truly necessary? If it is, fine—but we need to communicate why that is. Regarding the second, public access to the outdoor facilities after construction is a serious issue. School property is public property, and other high schools allow community access outside of school hours when the outdoor facilities are not being formally used by students. Our schools are community assets and we should be facilitating as much access as possible. Can we reconsider this now and communicate that—post-construction—we will allow the same access to Wells' outdoor facilities that we allow at other schools?	First and foremost, student safety is at the forefront of every decision made regarding campus access. The Ida B. Wells campus will allow generous public access, similar to, if not greater than the type of access that occurs at Lincoln, Cleveland and Jefferson. The Wells campus also includes an elementary school, Rieke, that brings special considerations for public use. The Wells campus is largely owned by PPS and not the Parks Bureau. It is different therefore from a campus like Grant which shares ownership and use with the Portland Parks Bureau. There are no current rights of public access to the Ida B Wells or Rieke campus, but for access to the Parks Bureau operated public pool. The conditional use permit that was approved by the city staff and affirmed by the city's Hearings Officer grants extensive public access to the campus in the following ways: There will be four new public access easements that allow pedestrian, vehicle and bike access through the campus. Three of these easements provide this access during and after school hours; Access to the public pool, owned and operated by the Parks Bureau, will be maintained and parking and circulation to the pool for the public will be enhanced and improved;

			The school will continue to be the public location for the Farmer's Market, again with enhanced circulation and parking; The proposal includes new field lighting which will extend the utility of the fields at PPS expense. These fields will be open to the public through the civic use of buildings program that applies to all schools equally across the district, east side and west side; and PPS has acknowledged that informal use of the school grounds will continue in non-school hours as long as that use does not lead to vandalism or other safety or cost concerns. PPS put data in the record showing the vandalism and theft that has occurred at IBW and how access without limitations is costly and impedes PPS ability to secure its assets.
Engelsman	Ed Tech (Policy Committee)	As we prepare for a screen time policy conversation, could you please provide answers to these questions? 1. Any existing list or inventory of educational apps or digital learning tools approved or in use district-wide or centrally managed (including chromebooks). 2. Any associated vendor agreements, contracts, or standard terms that are maintained on file for those applications. 3. Any existing documentation summarizing vendor privacy practices or data-sharing terms (such as privacy agreements, data protection addenda, or similar records held by the district). 4. Any records reflecting overall contract values, pricing summaries, or total expenditures associated with these applications (high-level	Answers below correspond to the number of question provided: (1) Yes, there is a list of approved instructional (educational) applications here: https://public-portal.classlink.com/ppsor. Vetting is a partnership with Academics, Legal, Finance, and OTIS. Note this list does not include hardware, which is what Chromebooks are... there is currently no centralized list of all hardware in service given the long duration of most of our hardscape infrastructure. (2) All vendors of approved applications, instructional or otherwise, are required to sign the Digital Resources Agreement, which has strong language regarding FERPA & CISP to protect student and staff data per federal regulations. Starting in 2026, PPS also requires software vendors to sign the "Software Data Privacy Consortium Data Privacy Agreement", which is another layer of protection for PPS. Given the large volume of agreements/contracts, Purchasing

		summaries are sufficient; detailed invoices are not necessary	& Contracting would need to pull all of that information. It is important to note that there is significant unapproved applications in our classrooms despite repeated communications, policy, and technical work to minimize or eliminate. (3) Please see the language in the Digital Resources Agreement and Software Data Privacy Consortium Data Privacy Agreement, both of which are required for all software purchases. (4) Purchasing & Contracting would be able to provide this information

La Forte	n/a	Can you give me a “tell me like I’m five” overview of situation regarding public access to Wells’ outdoor facilities after construction is completed? The community is telling us that PPS will not allow access—that the facilities will be locked when not in use by students during non-school hours. This is not typical of other high school campuses and has been a significant source of contention when it has come up in the past. What specifically has been communicated to the Wells community in terms of access?	First and foremost, student safety is at the forefront of every decision made regarding campus access. The Ida B. Wells campus will allow generous public access, similar to, if not greater than the type of access that occurs at Lincoln, Cleveland and Jefferson. The Wells campus also includes an elementary school, Rieke, that brings special considerations for public use. The Wells campus is largely owned by PPS and not the Parks Bureau. It is different therefore from a campus like Grant which shares ownership and use with the Portland Parks Bureau. There are no current rights of public access to the Ida B Wells or Rieke campus, but for access to the Parks Bureau operated public pool. The conditional use permit that was approved by the city staff and affirmed by the city’s Hearings Officer grants extensive public access to the campus in the following ways: There will be four new public access easements that allow pedestrian, vehicle and bike access through the campus. Three of these easements provide this access during and after school hours; Access to the public pool, owned and operated by the Parks Bureau, will be maintained and parking and circulation to the pool for the public will be enhanced and improved; The school will continue to be the public location for the Farmer’s Market, again with enhanced circulation and parking; The proposal includes new field lighting which will extend the utility of the fields at PPS expense. These fields will be open to the public through the civic use of buildings program that

			applies to all schools equally across the district, east side and west side; and PPS has acknowledged that informal use of the school grounds will continue in non-school hours as long as that use does not lead to vandalism or other safety or cost concerns. PPS put data in the record showing the vandalism and theft that has occurred at IBW and how access without limitations is costly and impedes PPS ability to secure its assets.
Engelsman	Rightsizing	Have we considered putting 6th grade back in elementary school?	In process
Engelsman	Rightsizing	(1) I have heard from parents and educators alike that we need to have the staffing model needs to be answered. How many educators/ staff / total will lose positions in rightsizing? Will every educator go with their school or will some go elsewhere? (2) what exactly will schools offer that they don't offer now? What does "well-resourced" mean? And ... are we aiming for well-resourced next fall or are we aiming lower for fall 2027? If we are aiming for lower, what does lower look like exactly? (3) how much will it save to close a school? (4) what do we spend on transportation district-wide now? Post rightsizing, what will we spend? Obviously we will likely be busing more kids around so what will that cost?	In process

Engelsman	Rightsizing	Are we taking into consideration the permanent affordable homes being built near schools? For example, we just heard about Gooseberry Trails right near Rieke in SW. And I know Creston families have been asking about the affordable apartments (that are 2-3 bedrooms and designed for families) being built near their school. And I have seen a set of townhomes being built right near Glencoe. How are we factoring these - and others - in? And for ones we don't yet know about, are we communicating with someone at the city who knows where and when others are slated to be built?	Yes, the Population Research Center at PSU does include these in their forecasts as they monitor housing developments. One in particular in the Rieke area was called out in the latest report which is published online. The public report, which we post yearly, can be found on our website and lists the new affordable housing they are considering in their methodology.
Engelsman	Rightsizing	What is the actual net savings to closing Sellwood? What are the net savings to closing any school?	In process
Engelsman	Rightsizing	What will enrollment/ capacity will look like at Hosford and Brentwood after absorbing Sellwood students - sellwood 537, hosford 524, brentwood 407 - sending them proportionately = 650-700 per middle school - and Hosford will now also get Sunnyside kids. How many is too many? We said we want 500 in middle schools, but we are about to create two that are north of 650 easily. Our own "sustainability threshold" that we saw on the slideshow today is 500 for middle schools, Also heard about George.	The 500-student sustainability threshold is a minimum planning benchmark for supporting middle school programming and staffing. It is not a maximum enrollment or a recommendation that every middle school serve exactly 500 students. Whether a school can appropriately accommodate additional students depends on its usable space, program needs, staffing, and shared facilities. For reference, in 2025/2026, West Sylvan MS had 683 students and Jackson MS had 689 students.

Engelsman	Rightsizing	Maplewood to Rieke. Why not Capitol Hill or Markham? At least one of those schools is closer and could accommodate, and is walkable and bikeable. And what if a little 5th grade child's friends are all in the 70% area and they are in the 30%?	In the Wells attendance area there are six elementaries, all are projected to be below the threshold of 360 in the fall of 2027. Four of them, Hayhurst (274), Stephenson (271), Rieke (252) and Maplewood (278) are roughly 80-100 students below the threshold. While we attempted to keep whole student populations moving together when a school is proposed for closure that was not always possible. We are looking for a range of enrollments at a school. The threshold represents the lower end of the range and the top is the functional capacity for the school. For example, Rieke's enrollment range would fall between 360 and 465 students. In order to get the remaining schools above the sustainable threshold, we proposed closing two schools in Scenario A. The six schools are interdependent and we moved students to the adjacent schools. Maplewood students were routed 30% to Rieke and 70% to Hayhurst because Stephenson's students consumed Markham's available capacity, while sending them to Capitol Hill would cause overcrowding and split middle school feeder alignments with this cohort. While the quantitative model optimizes for building utilization rather than non-measurable social networks, a 30% split still moves a viable, single-classroom cohort together rather than isolating individual students.

Engelsman	Rightsizing	Why are Sunnyside and Laurelhurst both losing their 6-8, while Winterhaven keeps theirs? Both Laurelhurst and Sunnyside have larger 6-8 programs than Winterhaven has. And Sunnyside is one of the few schools that has maintained enrollment over time. And both schools have a neighborhood aspect to their middle school.	Winterhaven is a full lottery school, while students can access Sunnyside both as neighborhood students and through the lottery. Winterhaven has a total of 40 slots available in the elementary years and 23 for middle school. This year Winterhaven's enrollment in early October is 323 students. The waitlist was 101 students. Sunnyside in contrast has 77 elementary transfer slots and 15 middle school slots. Its enrollment in early October is 507 students with a waitlist of 24 students. Both schools are in the southeast and are about 3 miles apart. They both draw students primarily from southeast schools and a large number come from Hosford for middle school. Laurelhurst in contrast is a K8 that serves neighborhood students. As of early October, the middle grades are much larger than the early elementary. (middle grades 75+ student and K-1 less than 50). The middle grades portion of the K8 will decline in the coming years.
Engelsman	Rightsizing	Why does a 6th grader at Hosford have 37 in her math class while a 6th grader at Winterhaven has 25 in her math class. If you're good at math, you get less in your class, but if you're struggling, you have 1/3 more? WHat are we doing to make sure neighborhood middle schools see class sizes go down?	This is partly due to how we subsidize the middle grades in K-8. Currently the middle grades in K-8 receive staffing based on sections per grade level, similar to K-5. Middle schools receive staffing based on overall enrollment.
Chase-Miller	Rightsizing	What specific resources will students gain in the receiving school?	In process

Chase-Miller	Rightsizing	Will class sizes get larger, smaller, or remain the same?	In process
Chase-Miller	Rightsizing	Will students gain access to additional specialists, electives, intervention staff, counselors, library services, arts, music, physical education, or enrichment opportunities?	In process
Chase-Miller	Rightsizing	What transition support will be provided to students, families, and staff?	We will provide the transition support framework with the Superintendent's proposal. The framework will identify how the central office team will support students, staff and families in coming months and for at least two years after the transition begins. The detailed transition plans will be developed with the communities after the final proposal has been voted on.
Chase-Miller	Rightsizing	What transportation costs, travel-time burdens, and safety considerations will be created by the change of potential consolidations or closures?	In process
Chase-Miller	Rightsizing	What investments will receiving/welcoming schools need before students arrive?	PPS is conducting receiving school readiness assessments through building reviews and walkthroughs with district staff to identify the investments needed to welcome additional students and programs. Our goal is for every receiving school to be ready for students on the first day of school. Findings from these assessments will guide how requested upgrades are prioritized and sequenced, with priority given to critical improvements needed to support the educational program.
Chase-Miller	Rightsizing	How will PPS protect student belonging, cultural identity, and school-community relationships, especially for racially minoritized students?	In process

Chase-Miller	Rightsizing	What will PPS do if projected savings do not translate into school-level improvements?	In process
Chase-Miller	Rightsizing	What ongoing costs might remain for closed buildings, including maintenance, security, insurance, utilities, surveillance, repairs, broker fees, legal work, demolition, or environmental remediation?	Closing a school does not eliminate all costs associated with its building. Until a building's future use is determined, PPS would continue to incur costs to protect and maintain the property, including basic utilities, maintenance, security and monitoring, insurance, and necessary repairs. These costs would vary by site and whether the building is vacant or remains in use. Additional costs—such as broker fees, legal services, demolition, or environmental remediation—would depend on the future use and condition of each property and would not apply to every building. The building repurposing plan will help identify these needs, and financial estimates will need to account for ongoing and one-time costs when calculating net savings. The repurposing process will be outlined in the Superintendent's Recommendation.
Chase-Miller	Rightsizing	What is the realistic timeline for selling, leasing, repurposing, or otherwise disposing of closed buildings?	PPS will share a proposed building repurposing process along with the Superintendent's Recommendation that outlines how options would be evaluated, including community engagement and the steps required under Board policy. Proposals about repurposing consider future district needs, building conditions, costs, and potential uses. Property-specific timelines would need to be developed

			through that process and would depend on required reviews and approvals by the Board of Education.
Chase-Miller	Rightsizing	How will PPS communicate which problems consolidations and closures can reasonably address and which broader structural conditions remain unresolved?	In process
Chase-Miller	Rightsizing	How will PPS monitor whether students who are displaced actually experience better educational conditions in well-resourced schools?	In process
Engelsman	Rightsizing	Cost of buses added to transport all these kids around the city? And have we tested the bus routes?? We are living the disaster of Cleveland kids trying to get to Marshall despite knowing this was happening for years in the making.	In process
Engelsman	Rightsizing	What about Sellwood kids now having to go at rush hour up Milwaukie and either over the 12th railroad that creates traffic disasters daily, or up Powell which is busy and 26th, which is CLOSED.	In process
Engelsman	Rightsizing	How about Skyline, which will now be crossing the St. Johns Bridge - which on a good day has traffic but at rush hour takes a long long time to get over. And how about families who will then be on the opposite side of the river should a natural disaster happen or just a car accident that closes the St Johns bridge down for a couple of hours.	In process
Engelsman	Rightsizing	Impact on the neighbors directly around Hosford and Brentwood as 300+ more kids / yellow buses / cars come into the area. Safety for kids walking / biking?	In process

Engelsman	Rightsizing	Buckman arts program? What about Title I funding? If Buckman - a Title I school - feeds into Sunnyside and Abernethy - not Title I schools - what is the cost of lost Title I federal funding?	Federal Title IA funding is tied to student demographics, not physical school buildings. If students from a Title I school like Buckman are redirected to non-Title I schools like Sunnyside and Abernethy, Portland Public Schools (PPS) as a district does not lose that federal funding. The funds follow the concentration of poverty, and the mechanics of how it is determined and allocated work like this: District Allocation: The federal government allocates Title I funds to the school district based on the total number of students living in poverty across the entire district, regardless of which specific school building they attend. School Thresholds: PPS distributes these funds using a recommended school-wide allocation model. For a K-8 school to receive Title I funding, at least 33% of its enrolled students must qualify for state support services. PPS receives a waiver for 33% the ODE Threshold is 35% and typically 40% for Schoolwide implementation. Per-Student Funding: Once a school crosses that 33% threshold, its specific budget allocation is calculated based precisely on the number of qualifying students (through direct certification) enrolled in that building. The Impact on Sunnyside and Abernethy If Buckman students transfer to Sunnyside and Abernethy, those eligible students continue to generate Title I funding for the district. What changes is the school-level distribution: If the threshold is met: If receiving Buckman's students pushes Sunnyside or Abernethy's demographics over the 33% qualifying mark, those schools will gain Title I status. They will then receive Title I funding based on their new number of qualifying students. If the threshold is not met: If the influx of Buckman students is diluted by the existing populations and the receiving schools remain under the 33% threshold, Sunnyside and Abernethy

			will not receive Title I funds. The district does not lose this money; instead, the district redirects those funds to other PPS schools that do meet the highest concentrations of poverty. Title eligibility will be identified for all PPS schools in the late winter/early spring and depend entirely on Federal allocations. Ultimately, the federal dollars remain within PPS to support historically underserved students, but whether a specific school receives those dollars depends entirely on the demographic percentages of its finalized student body.
Engelsman	Rightsizing	Buckman - one of the Title I schools that's also a focal option school - some kids will now have to cross Stark, Belmont, Hawthorne and 20th to get to Abernethy or Sunnyside. Why? Why not send them north to a closer school? Many of the families live north of Burnside.	The district's core constraint in this scenario is keeping existing student bodies together and capping program splits to no more than two receiving schools. Sending students north would further fragment the displaced Buckman student cohort across additional northern receiving sites. The Buckman facility is located 1.3 miles from Sunnyside and 1.1 miles from Abernethy. Beverly Cleary and Laurelhurst are both about two miles from the Buckman facility. BEH is about 3 miles from the Buckman facility. Irvington is about 1.8 miles from the Buckman facility but is proposed for closure.
Engelsman	Rightsizing	Why do we have a list that has close to 50% Title I schools closing?	In process
Wang	Rightsizing	Can you explain the process for the decision to name Sellwood MS as one to close (you may already have been planning to address this I'm guessing). Data, population trends, equity (like supporting enrollment at Brentwood).	In process

Wang	Rightsizing	What is the plan for boundaries? I may specifically address the interesting tetris-like shape that Beaumont and Tubman have found themselves in	One of the primary considerations identified in the guiding principles was to keep students moving together as much as possible when we modeled changes. When we change boundaries within a current attendance area this means that we would ask students to separate from their current peer group. Due to model constraints and priorities, this led to considering moving whole elementary populations as one group where possible. As a result the boundaries built on current elementary attendance areas which resulted in tetris-like shape boundaries. Once the elementary and middle schools are stabilized, the district may want to consider future boundary adjustments as part of a districtwide process focused on boundaries.
Wang	Rightsizing	Can you share where split feeders have been reduced or eliminated? I think it would be clarifying and helpful to have that information all together.	See the slide presentation from the 10.20.22 Board Presentation. The information is on slides 20-22. We were able to reduce the number of middle schools that feed to multiple high schools but not the number of splits between elementary and middle school.
Wang	Rightsizing	What considerations or explorations have happened for the Harrison Park split feeders?	We explored many options to reduce split feeders including High School changes. Ultimately, enrollment balancing at K-5 and 6-8 made this difficult to not have additional tradeoffs.
Wang	Rightsizing	I may also ask about the building, structural, capacity, transportation, etc. considerations that went into Lewis/Duniway and Marysville/Arleta	In process
Chase-Miller	Rightsizing	What specific resources will students gain in the receiving school?	In process
Chase-Miller	Rightsizing	Will class sizes get larger, smaller, or remain the same?	In process

Chase-Miller	Rightsizing	Will students gain access to additional specialists, electives, intervention staff, counselors, library services, arts, music, physical education, or enrichment opportunities?	In process
Chase-Miller	Rightsizing	What transition support will be provided to students, families, and staff?	We will provide the transition support framework with the Superintendent's proposal. The framework will identify how the central office team will support students, staff and families in coming months and for at least two years after the transition begins. The detailed transition plans will be developed with the communities after the final proposal has been voted on.
Chase-Miller	Rightsizing	What transportation costs, travel-time burdens, and safety considerations will be created by the change of potential consolidations or closures?	In process
Chase-Miller	Rightsizing	What investments will receiving/welcoming schools need before students arrive?	PPS is conducting receiving school readiness assessments through building reviews and walkthroughs with district staff to identify the investments needed to welcome additional students and programs. Our goal is for every receiving school to be ready for students on the first day of school. Findings from these assessments will guide how requested upgrades are prioritized and sequenced, with priority given to critical improvements needed to support the educational program.
Chase-Miller	Rightsizing	How will PPS protect student belonging, cultural identity, and school-community relationships, especially for racially minoritized students?	In process
Chase-Miller	Rightsizing	What will PPS do if projected savings do not translate into school-level improvements?	In process

Chase-Miller	Rightsizing	What ongoing costs might remain for closed buildings, including maintenance, security, insurance, utilities, surveillance, repairs, broker fees, legal work, demolition, or environmental remediation?	Closing a school does not eliminate all costs associated with its building. Until a building's future use is determined, PPS would continue to incur costs to protect and maintain the property, including basic utilities, maintenance, security and monitoring, insurance, and necessary repairs. These costs would vary by site and whether the building is vacant or remains in use. Additional costs—such as broker fees, legal services, demolition, or environmental remediation—would depend on the future use and condition of each property and would not apply to every building. The building repurposing plan will help identify these needs, and financial estimates will need to account for ongoing and one-time costs when calculating net savings. The repurposing process will be outlined in the Superintendent's Recommendation.
Chase-Miller	Rightsizing	What is the realistic timeline for selling, leasing, repurposing, or otherwise disposing of closed buildings?	PPS will share a proposed building repurposing process along with the Superintendent's Recommendation that outlines how options would be evaluated, including community engagement and the steps required under Board policy. Proposals about repurposing consider future district needs, building conditions, costs, and potential uses. Property-specific timelines would need to be developed through that process and would depend on required reviews and approvals by the Board of Education.

Chase-Miller	Rightsizing	How will PPS communicate which problems consolidations and closures can reasonably address and which broader structural conditions remain unresolved?	In process
Chase-Miller	Rightsizing	How will PPS monitor whether students who are displaced actually experience better educational conditions in well-resourced schools?	In process
La Forte and Sullivan	Rightsizing	Would it be possible or staff to combine the K-5/Middle School maps for each rightsizing scenario? I'd like to be able to see all potential closures in one document for each option so I have a better sense of whether or not we're creating any "school deserts."	Almost Ready
Engelsman	Rightsizing	send me the estimated cost to move schools / programs to be ready for the 2027-28 school year? And (b) who will be doing the move work (specifically, will Procedeo be handling this as they handled the Cleveland to Marshall move)? (c) am I right that this cost will come out of the general fund (ie is not the bond fund)?	In process
Engelsman	Rightsizing	please send me a map of where Clark DLI students live versus where Woodstock DLI students live? And (b) how many of the kids in the maps are native speakers versus non-native speakers.	In process
Engelsman	Rightsizing	the added transportation costs of school buses to get students around under scenarios A and B?	

Engelsman	Rightsizing	send me the estimated cost to move schools / programs to be ready for the 2027-28 school year? And (b) who will be doing the move work (specifically, will Procedeo be handling this as they handled the Cleveland to Marshall move)? (c) am I right that this cost will come out of the general fund (ie is not the bond fund)?	In process
Sullivan	Rightsizing	I notice that Roosevelt is 1419 students and 101% utilization while Lincoln is 1647 enrollment and 83 % utilization currently. What are the proposed utilization and enrollment numbers for Roosevelt when Jefferson opens?	In process
Chase-Miller	Rightsizing	I emailed this the other night but will repeat it for the sake of having all my current questions in the same place: my understanding was that James John was selected because they aren't ADA compliant, but the community is telling me that they have an elevator now and ramps. My first question is whether that's accurate, and if it is, whether the decision to close James John continues to be the right decision if they are actually ADA accessible.	In process
Chase-Miller	Rightsizing	Similarly, have we double triple quadruple checked the housing starts? Maplewood seems pretty certain that Alpenrose should be a game changer for them. Not sure if that's the same development that was mentioned at our meeting, but I would like us to be certain we are dotting our i's and crossing our t's.	In process
Chase-Miller	Rightsizing	To what extent are we planning to use bond funds for ADA work at receiving schools that are not	In process

		ADA compliant? Ockley Green is one example I know of off the top of my head.	
Chase-Miller	Rightsizing	When we get to the real estate of it all, are there plans to commit one of the vacated buildings to Indian Ed? What conversations/commitments were made to Indian Ed in the past? If we don't already have plans to do so, is this feasible? What barriers, if any, exist?	In process
Chase-Miller	Rightsizing	Does it make sense to consider any of the vacated properties as replacements for the prophet center through our deal with AVT? My assumption is that, like with Grice Adair, a remodel would be cost-prohibitive, but makes sense to ask.	In process
Sullivan	Rightsizing	I notice that Roosevelt is 1419 students and 101% utilization while Lincoln is 1647 enrollment and 83 % utilization currently. What are the proposed utilization and enrollment numbers for Roosevelt when Jefferson opens?	In process
Chase-Miller	Rightsizing	As a follow-up to that question, are there other schools that were selected because they aren't ADA compliant? If so, can we confirm that information? Hearing that we may be wrong at James John makes me nervous that we're wrong about other locations.	In process
Engelsman	Rightsizing	One quick question: is the Mandarin immersion program that's currently at Cleveland moving to Franklin as part of rightsizing?	The Mandarin immersion program stays at Cleveland in any scenario.

		Students who are juniors this year and almost done with IB and are also in Mandarin immersion ... must they choose IB or Mandarin?	
Chase-Miller	Rightsizing	Do we have data that shows what enrollment would be for the schools projected to close, if focus options weren't pulling from them? For example, I was at my niece's first birthday party a couple weeks ago in the RCP neighborhood. When I asked my brother's neighbor if their kids were at Marysville, she said one was at DaVinci and one was at Sunnyside. Are there schools that could be saved if their enrollment wasn't being pulled by focus option schools? And, do we have data supporting the suggestion that we would lose most of these families to private or charter schools if we didn't offer a focus option? FWIW, I would still like to see focus options, but in a similar fashion to what we're doing with DLI, concentrated regionally around the city.	In process
Sullivan	Rightsizing	Have there already been discussions with transportation about bussing to different schools or are you waiting for the decision to be made? Same question for aftercare programs.	In process
Sullivan	Rightsizing	Can we have a flow chart of dual language immersion programs? The one you made for the current state was very helpful. It would be useful to compare the two.	This resource is being finalized.
Sullivan	Rightsizing	One of my hopes for right-sizing is that non-English speaking learners have better support	In process

		than they have currently. Does right-sizing make that happen?	
Sullivan	Rightsizing	Please compare the number of split feeders in the rightsizing plan vs. the current number. Is Bridlemile still a split feeder to West Sylvan and Robert Gray under the rightsizing plan?	In process
La Forte	Rightsizing	What is the estimated savings for each Rightsizing scenario? Please include transportation estimates to arrive at the estimate.	Superintendent Armstrong presented these estimates at the October 20th Board meeting. 10/20 Superintendent's Board Report. Estimates for each scenario were provided on slide 9. Estimated operational savings for Scenario A are $14 million and for Scenario B are $11 million. Transportation estimates will be included in the Superintendent's final recommendation.
La Forte	Rightsizing	What is the baseline staff plan for a "rightsized" K-5 and "rightsized" Middle School?	Staffing will be included in the Superintendent's final recommendation.
La Forte	Rightsizing	Were property zoning restrictions for each school a consideration when selecting schools that may close?	Zoning and land use was not reviewed or considered as a factor in the scenario development.

La Forte	Rightsizing	ROSE CITY PARK: I'm a little confused regarding relocating VDLI. The proposal has it moving to Vestal. Would it still be a colocated program but at Vestal instead of Rose City Park? Please provide a scatterplot map of current Rose City Park student addresses, excluding Vietnamese DLI. I would like a visual representation of where students live now. Please provide a scatterplot map of Scott student addresses. I would like a visual representation of where students live now. Please provide a scatterplot map of Vestal student addresses. I would like a visual representation of where students live now. Please provide a scatterplot map of VDLI student addresses. I would like a visual representation of where students live now. Why was the Rose City Park building specifically selected for closure.	Re: VDLI--Yes. In Scenario A, Vietnamese Dual Language Immersion moves to Vestal and is co-located there. After consulting with legal, it was decided the info on maps could not be shared out broadly. Legal advised that we could show the maps in person but not disseminate them. From Rose City Park Rightsizing Page: There are typically 2-3 homerooms per grade level at Rose City Park. Vietnamese Dual Language Immersion and English scholars sections vary by grade level. Sometimes the VDLI has two homerooms and other grade levels have English scholars with a single homeroom. In scenario A both Scott and Vestal would be above the sustainable threshold. In Scenario B only Rose City Park remains above the threshold. Closing Rose City Park increases stability to two schools in the area. Facilities concerns are significant including age of building (1912), major mechanical, piping and ventilation issues requiring significant and disruptive upgrades. These are costly and would require site relocation. This in addition to the significant seismic concerns. Building conditions that require significant investments for seismic and other major operational systems were an important, but not the sole driver, for why the school was considered for closure in Scenario A.

La Forte	Rightsizing	TUBMAN MIDDLE SCHOOL: Please provide a scatterplot map of current Tubman students addresses. Please provide a scatterplot map of current Sabin student addresses. Please provide a scatterplot map of current Vernon student addresses. Please provide a scatterplot map of current King student addresses, excluding Mandarin DLI. In 2017, the MLK Jr. site was internally the district's initial first choice for the Tubman middle school location. As we consider the future of this pocket of schools--Tubman, Sabin, King, Vernon—I would like for the district to consider Tubman's future and include it as part of the plan. The state has given PPS $120M to build a new Tubman. When we look at the sites of the schools that are closing—we can prevent this corridor where N/NE intersect from losing a school. This is especially important as we look at the change in feeder pattern. Please provide movement data from the pins located in the hillside below Tubman to indicate how much movement has taken place in the last 10 years.	After consulting with legal, it was decided the information on maps could not be shared out broadly because they could have personally identifiable information. We can provide more general heat maps of population density. Heatmap for where students live for Tubman. Heat map for Sabin. Heat map for Vernon. King non-DLI

La Forte	Rightsizing	JAMES JOHN Why was the James John building specifically selected for closure? It's closure gives me significant pause. I was already concerned because of the ripple effect on the viability of the St. Johns neighborhood and the impact on North Portland as a whole. I am even more concerned after hearing from the community at the Roosevelt forum. A stand-alone Spanish immersion school is giving me pause after hearing from families at the Roosevelt forum. I'd like to talk more about this.	The enrollment of the three schools with elementary age students in Spanish Dual Language Immersion that feed to Roosevelt are all under the respective thresholds Sitton (311), James John (352) and Beach (287). Chavez is also underenrolled as a K8 (392). Scenario A and B propose to make Chavez a K5 Spanish Dual Language Immersion whole school model. In 2027-28 Chavez is projected to have the largest Spanish DLI K5 population of 214, compared to 126 for Beach, 137 and James John and 130 at Sitton. With this proposed change the English scholars populations at all three schools would be below 225 students. James John and Beach close to join Sitton and Chief Joseph respectively. Sitton was chosen to receive students from James John in part because of its single-story layout which provide easier physical accessibility for students and staff. Sitton and James John heat map

La Forte	Rightsizing	ACCESS: What are the minimum requirements to enroll in ACCESS? Is it 99% percentile in one area or two areas (Reading vs. Math vs. Cognitive Ability)? How many students are currently eligible for ACCESS? Please include current schools and grade bands. How many students applied to access over the last, say, five years (broken down by year). Please provide a scatterplot map of students connected to the applications. Has moving ACCESS to Sabin (one of its former locations) been considered? Or another neighborhood location that may have what I'm calling "school deserts?"	ACCESS Eligibility requirements can be found on the ACCESS Academy webpage. Annually, the number of students eligible for the ACCESS lottery ranges from 2600-3000 students. In 2026 the number of eligible students was 2,648, representing all schools serving students in eligible grades (1st - 7th). The grade band counts are as follows: Grade Count 1 211 2 280 3 419 4 426 5 458 6 457 7 397 2027 lottery eligibility data will be available after Winter benchmark assessments. Please see ACCESS application linked data here. After consulting with legal, it was decided the information on maps could not be shared out broadly because they could have personally identifiable information. We can provide more general heat maps of population density. For this particular question we need to determine if we can pull this information. It is not readily available. We have not considered moving the ACCESS program to another site.
La Forte	Rightsizing	FOCUS OPTIONS: How many focus Focus Option students are TAG students? Please provide a scatterplot map of all students who attend focus options (easier to visualize than a zip code list). I would like to understand if they	Please see linked info here. After consulting with legal, it was decided the information on maps could not be shared out broadly because they could have personally identifiable information. We can provide more general heat maps of population density.

		are concentrated in certain areas or equally spread out across the district. I would like to see another scenario that includes the elimination of Focus Options and how that would impact the scenarios.	
Engelsman	Rightsizing	Could you please tell me: (1) the population of elementary and middle school students who live in each quadrant? (2) separately, how many elementary and middle school kids attend a school in each quadrant? (so a Buckman student who lives at 16th and NE Couch would count differently in each question as the student lives in NE but attends a school in SE)	
Splitt	Rightsizing	I remain interested in how staffing will be determined. We heard a bit about the PAT contract and the district seeing if we can make some changes to allow for a different approach - which I support exploring, but what about principals, school counselors, social workers, etc?	
Sullivan	Rightsizing	Have there already been discussions with transportation about bussing to different schools or are you waiting for the decision to be made? Same question for aftercare programs.	In process
Sullivan	Rightsizing	Can we have a flow chart of dual language immersion programs? The one you made for the current state was very helpful. It would be useful to compare the two.	This resource is being finalized.

Sullivan	Rightsizing	One of my hopes for right-sizing is that non-English speaking learners have better support than they have currently. Does right-sizing make that happen?	In process
Sullivan	Rightsizing	Please compare the number of split feeders in the rightsizing plan vs. the current number. Is Bridlemile still a split feeder to West Sylvan and Robert Gray under the rightsizing plan?	In process

La Forte	Rightsizing	Topline: In one sentence, what problem are we trying to solve for our DLI students? At the Roosevelt listening session on Friday, staff said that the Rightsizing plan actually started with converting our DLI programs to a whole school model. Is that correct? Were other alternatives evaluated before deciding to move towards whole-school DLI? The presentation cites research and Lent Elementary as proof points that whole school DLI produces better outcomes than a co-located model. ◦ What were Lent's academic achievement and student outcomes before and after transitioning to whole-school DLI? Please provide comparative data showing the magnitude and timeframe of gains, whether they were statistically significant, and how outcomes compare with those of co-located DLI programs. ◦ How much of any improvement can be attributed specifically to the school configuration? ◦ What other changes occurred at Lent? Leadership? Staffing model? At Friday's listening session at Roosevelt, James John families raised significant concerns about	For DLI we are trying to consolidate programs to provide programs at scale to maximize support we can provide for students. DLI consolidation and K-8s were driving forces in the Roosevelt cluster. See the description above in the question about James John to see the relative size of the Spanish DLI programs at Beach, Chavez, James John and Sitton. Lent has experienced significant changes and challenges for over a decade. Prior to the opening of Kellogg Middle School, Lent was a K-8 with both a neighborhood and Spanish DLI program. By the 18-19 school year, most of Lent's programs were single strands or near those numbers in both DLI and neighborhood. Lent had also undergone many principal changes, including well documented events in the media. During the pandemic, Lent began its first conversion from K-8 to K-5 with the opening of Kellogg MS. Later it was converted to a K-5 Spanish immersion school. Their principal of 2.5 years left to open Kellogg MS. Since that time, Lent has had three other principals. Lent Reading OSAS over time Lent Math OSAS over time

		access to after school childcare which takes place at across the street at the St. John's Community Center. Did PPS have the opportunity to take after school care options into account when designing the whole school DLI model? At Friday's listening session at Roosvelt, James John families expressed concern that whole school DLI for NoPo felt like "defacto segregation" and had real concerns about being targeted by ICE. How did this factor into our decision making? The proposed North Portland DLI model shows three to four dedicated bus routes, 10–14 stops, and an average of 20 minutes per route. Are those estimates based on actual routing analysis? The Russian Immersion program is small with only 14 kindergartners. Is there a point where it become unsustainable?	
Splitt	Rightsizing	Why were some schools selected for both A and B, while others just for A? What makes Stephenson, Lewis, and Rose City Park the ones that were selected to stay open in B?	In process
Splitt	Rightsizing	Can I get a full understanding of the PSU projections for Alpenrose, and why fewer units in Rieke yield more students? Given the size estimates for Hayhurst, the estimate of 12 students - which may or may not be in the enrollment	In process

		projections for the new merged school - could lead to issues if that estimate is offbase.	
Splitt	Rightsizing	How are special education programs accounted for in building use numbers? For example, two SES classes take up four classrooms to allow for a sensory space during events and a place for smaller group or 1:1 work. Is that considered two classrooms or four in the building usage analysis? If we plan to require those programs to use less space in buildings that are fuller, how will we support that transition? Similarly, how are spaces for speech-language support, small group tutoring, and school psychologist visits accounted for?	In process
Splitt	Rightsizing	We heard from someone who worked on a different project using PSU population forecasts. They had the PSU numbers audited and found some inaccuracies. How have we audited or double-checked those numbers and can we do that?	In process
Splitt	Rightsizing	Can we look into possibilities for allowing certain changes to phase in? The example a 7th grader sent in included phasing the Beaumont DLI change, so that students already there could finish middle school, while rising 6th graders would start at the new school. Are there places where phasing in could happen to allow kids to continue in current program until they matriculate, while the program change takes effect for incoming students?	In process
Splitt	Rightsizing	Speaking of phasing, the Sellwood to Hosford and Brentwood change makes for some very big school sizes in the near term. What happens if we	In process

		wait for that change and let those bigger years pass as is?	
Splitt	Rightsizing	Can we have a neighborhood school - no lottery - with a special focus? For example, could Sunnyside keep its environmental program, allow current students to finish 5th grade, and bring some level of environmental focus/Sunnyside traditions to Hosford MS? (For that matter, perhaps as Buckman kids move over, some elements of the arts traditions could come to Sunnyside too)	In process
Splitt	Rightsizing	My understanding is that PPS did some piloting of enrollment campaigns after we did the exit survey; can we give an update on that work?	In process
Splitt	Rightsizing	I still think providing an understanding of current central office staffing versus 2018 would be helpful to dispel the perception that the central office has grown (or at least the extent to which it has grown). Could the district provide a compare and contrast of 2018 to 2025, and then to 2026, after we made significant cuts to the central office?	In process
Splitt	Rightsizing	I am interested in really understanding how the district will support receiving schools through the transition, something we know is critically important from the SEGC audit. I have already requested a transition plan template; I hope it includes how the central office team will be integrated into the process.	In process

Splitt	Rightsizing	Do we have information on estimated class sizes after changes take effect? There is a lot of speculation that this will lead to too-high class sizes. Could we take any action to limit class sizes in receiving schools or in general to help alleviate this concern?	In process
Splitt	Rightsizing	What is the latest on Smith School and our attempts to divest that property?	In process
Splitt	Rightsizing	Will we get the information on each building's title/deed and zoning dynamics?	In process
Splitt	Rightsizing	What can we provide to offer clarity about what happens to closed schools to avoid blight?	In process
La Forte	Rightsizing	Under each scenario, how many students will be displaced in total (moving from one building to another for any reason including K-8 conversions to middle schools)? Under each scenario, how many non-DLI students will be displaced? Under each scenario, how many DLI students will be displaced?	Students who move We are also realizing that we overcounted students in this data who would be moving even without "rightsizing" occurring. For example 5th to 6th graders at non K8 schools and 8th to 9th graders to HS. Once completed, the actual number will be lower than what has been presented.
La Forte	Division 22	Division 22-Why are we not in compliance for instructional hours. Please provide us data of instructional hours broken down by school and grade band instructional hours (percentage).	2025-26 Required Instructional Time and Exemption B… We are not in compliance because of the furlough days last year.
Sullivan	Rightsizing	How long is the bus journey from Atkinson to lent? Will the Transportation Department give us a report on all bus questions?	In process

		I would like a report from transportation on the safety concerns of the journey from Skyline to Roosevelt.	
Sullivan	Rightsizing	What are the building safety conditions between Lewis and Duniway as receiving schools?	In process
Sullivan	Rightsizing	Concern over keeping diversity and neighborhood cohesion. We don't want to isolate our Spanish DLI. Is it possible to keep the K-5 DLI programs in the neighborhood and then combine them 6-8?	In process
Sullivan	Rightsizing	Why is James John the closing school over Sitton? James John seems to be more connected to a thriving community with after care facilities.	In process
Engelsman	Rightsizing	what capture rate is the district using post-rightsizing when projecting numbers at schools?	In process
Engelsman	Rightsizing	for any focal option / DLI student who is in a program at a school that is not their neighborhood school - can that student choose to stay with the neighborhood school (i.e. stay at Atkinson) instead of moving either to the DLI hub (Lent) or back to their designated neighborhood school somewhere else in the city	In process
Engelsman	Rightsizing	will staffing models attached to the scenario(s) include the $65M budget deficit? Or will we see staffing models for now and then after rightsizing with the new budget, will we then see staff cut from those staffing models that will be implemented by then? More concisely said: will staffing models show include the $65 M budget deficit?	In process

La Forte	Rightsizing update: 10/20 board meeting	Slide 7 of presentation:All of the rankings, the number of people surveyed, etc. I'm assuming this is all in a google sheet that you can share. How was "right mix of students" defined on the questionnaire? How/when was this information captured?	Yes, we spoke to this during the board meeting on 10.20.26. This information is posted on our Rightsizing webpage under What we heard. Here is the link to the summary produced by our Research and Assessment Team. This is copied from the questionnaire 8) Our PPS Student Assignment Policy asks us to consider the following six factors. Please select the three most important factors to consider during program and enrollment balancing across our system. Right Pathways: A feeder pattern that allows as many students as possible to continue together from one school level to the next Right Mix of Students: Student body demographics Right Boundaries: Compact boundaries that promote safer routes to schools and a sense of community as well as recognize and address natural and human-made barriers Right use of Space: Optimal use of existing facilities Right Balance: Program and enrollment stability in the surrounding schools Right Impact: Limiting the impact of boundary changes to the smallest number of students possible This information was captured during the Board of Education engagement sessions in April, 2026.
Engelsman	Rightsizing	Please share the data on attendance rate after Lent transition to a whole school DLI model.	In process

Engelsman	Rightsizing	Please share what programming could be expected in a "sustainable school". Specials, electives, etc.	In process
Engelsman	Rightsizing	(1) Creston has been retrofitted with electronic deaf reader boards, flashing lights for fire drills and fire emergency, carpet in classrooms for acoustics, and FM radio systems connecting to devices so the CRIS program students have a safe and supportive environment to learn. QUESTION: has this been taken into account when moving CRIS out of Creston and how much will it cost and how much time will it take to retrofit another school in order to successfully welcome CRIS?	In process
Engelsman	Rightsizing	is revenue from the CRIS preschool and CRIS program being calculated in the "cost per student" at Creston?	In process
Engelsman	Rightsizing	A Head Start program is a block from Creston and the program uses Creston's lunch program. Head Start will continue to use the Creston building for lunch and other services, even if Creston Elementary School is no longer there. QUESTION: how much will it cost to maintain the building *as is* so Head Start has a safe, warm, lights-on facility to come to daily?	In process
Engelsman	Rightsizing	Creston, as many SE schools, was heavily affected by SEGC boundary changes and this problem was inadvertently created by PPS. QUESTION: has PPS considered redrawing boundaries similar to pre-SEGC?	In process

Engelsman	Rightsizing	Creston is home to a Preschool For All program, a SUN program, and a brand new CRIS preschool program (just signed a long lease). QUESTION: where will these programs go that is close to the community they serve and how much will it cost to move them?	In process
Engelsman	Rightsizing	In the event the final scenario - after taking all the above into consideration - still recommends closing Creston Elementary School, could Creston be on a staggered close date (maybe fall 2028 or even fall 2029) so all work that needs to be done can be done before students move?	In process
Engelsman	AI Practices/Policies	Why has PPS just implemented this consent form (I believe it was required in March of 2025)?	In March 2025, Google announced that it would be creating a new “bundle” of services by dividing its current offerings into “Core Services" and “Additional Services”. More information can be found here The initial guidance was that PPS’s annual Acceptable Use Policy consent would continue to cover usage of all products, regardless of this new categorization. However, new guidance was received that the current Acceptable Use Policy consent only covered “Core Services” and not “Additional Services” This prompted the additional communication for parent/guardian consent sent on October 23 and October 27 (which is attached for your information).
Engelsman	AI Practices/Policies	Why has PPS chosen to bundle all of these "additional services" together into one consent?	Given the complexity of current curriculum use of Google Additional Services in higher grade levels along with implementation in the current semester, the decision was initially made to request consent for all services at this time.

Engelsman	AI Practices/Policies	Can these be unbundled to allow a more granular consent process for families?	On October 27, PPS invited parents to indicate a more granular consent or denial, and will continue to work on the “app by app” consent process
Engelsman	AI Practices/Policies	What learning goals/objectives are these "additional services" tied to and where/how are these tools used in the classroom?	The answer to this question depends on many factors such as grade level, subject material, teaching modality, student needs (SPED, DLI, etc.)
Engelsman	AI Practices/Policies	Has PPS tried to negotiate with Google for more stringent educational privacy standards for these "additional services"?	Google’s terms of services include data privacy language - More information can be found here. PPS’s experience is that Google does not individually negotiate its terms of service with school districts. However, Google's terms of service include data privacy protections.
Engelsman	AI Practices/Policies	Why is PPS comfortable with less stringent privacy and data collection standards with the "additional services"?	We are currently evaluating whether access to YouTube (or any of the “Additional Services”) is “necessary” and whether there are alternative ways to achieve the educational goals. We have received feedback from multiple teachers at high schools that blocking YouTube has impacted their curriculum, effectiveness, and student learning. In addition, it has caused some unintended effects for students and staff right before the grading period closes. PPS is working to have a stronger delineation of YouTube restrictions and usage between grades (K-5, 6-8, HS) and expects to continue to make a change in the upcoming weeks.
Engelsman	Rightsizing	(1) at Hosford and Brentwood, are the number of bathrooms in the buildings up to code to allow for the number of students who would be at the schools in the 28-29 school years and beyond? If so, what is the code relied on. If not, is the school "grandfathered in" and therefore not required to be up to code?	In Process

Engelsman	Rightsizing	The "steam issues" at Sellwood have been fixed as part of the 2024, 25 and 26 renovations. Why are those not incorporated in when looking at building conditions?	In Process
Engelsman	Rightsizing	Errors mentioned by a former rightsizing expert who has worked on rightsizing efforts nationally (McKay Larrabee). What external experts did PPS contract with? Consult with? Salem-Keizer and most other efforts nationally employed external experts and it appears PPS did not.	In Process
Engelsman	Rightsizing	Richard Smith told me at a board meeting that losing title status does not matter and that the money follows the students. Why then do we classify schools at all as Title I schools? What is the benefit of the label? (Richard's comment is contradictory to a district comment at Marshall "when a school loses title, there is bridging that happens, but yes eventually the school will lose resources.")	In Process
Engelsman	Rightsizing	Are the numbers in projects run with the 10/2/26 official student count numbers? (b) how did the projects for the 2026/27 school year differ from the actual counts on 10/2/26?	In Process
Engelsman	Rightsizing	There appears to be a large bubble in 2027-28 in middle schools that, especially for Hosford, pushes Hosford over the 700 limit (nobody can remember when Hosford was ever that big). Has thought been put into making middle school changes *after* the big bump so the students in the schools don't have a year of massive overcrowding?	In Process

Engelsman	Rightsizing	Grout is a Title 1 and the "right size" and is not being touched in this process. But parents there have told me they do not have the appropriate supports in the school or classroom to keep students safe and to keep learning consistent. What additional supports, if anything, will be given to schools that are not being touched in this process?	In Process
Engelsman	Rightsizing	I would love to see the numbers run on these 2 questions: Sabin and Irvington merge with Beverly Cleary. If they cannot all fit in Irvington while BCS is being renovated, then Sabin stays open for the year, then they all move into the new BCS space that becomes a K-5. They would all stay together for middle school and high school. Alternatively, since I believe some of Sabin is very close to Irvington and Grant (I remember from the Jefferson dual enrollment conversations), then could we adjust boundaries of Sabin so some become Irvington zoned and some remain Sabin zoned (and therefore change elementary schools)?	In Process
Chase-Miller	Rightsizing	Were spaces for CB and SES classrooms included in our initial analysis of buildings? If not, how did we miss something so significant? To what degree does this omission require us to reassess which sites we're proposing?	In Process

Chase-Miller	Rightsizing	The SEPTSA report calls out that the district's proposals concentrate more students with IEPs at higher-poverty receiving schools. To what degree do our scenarios, and ultimately the final recommendation, change which schools are Title 1 schools?	In Process
Chase-Miller	Rightsizing	Are students from high-poverty communities over-represented in the SPED community? How much is overlap socio-economic, and how much of the concentration called out by SEPTSA a result of how we configured these scenarios?	In Process
Chase-Miller	Rightsizing	I think I've asked this before, but to what degree do we plan to upgrade receiving schools to ensure they're ADA compliant?	In Process
Chase-Miller	Rightsizing	SEPTSA's analysis suggested that many of our receiving elementary schools may not have enough room to meet projected needs. Have we analyzed this, and is this true?	In Process
Chase-Miller	Rightsizing	RIght-sized schools will be larger by PPS standards, but how will our student body populations measure up compared to elementary and middle schools in similar-sized districts?	In Process
Chase-Miller	Rightsizing	Creston and the CRIS program have done a lot of work to make the entire school functional and accessible for students who are deaf and hard of hearing. Will those building modifications move with the CRIS program?	In Process

Chase-Miller	Rightsizing	Creston and the CRIS program have done an incredible amount of work to develop a school culture that is inclusive and affirming, which includes a ton of work with staff and neighborhood families to learn how to be in community with the students in CRIS in authentic ways, and develop curriculum that is inclusive for all students. What plan do we have to facilitate such a massive, academic, and logistical shift at Glencoe?	In Process
Chase-Miller	Rightsizing	What will happen to the CRIS preschool program at Creston? Will it be able to follow the CRISP K-5?	In Process
