FIO Committee Presentation, Nov 9, 2026: graded copy

Original PPS slides (BoardBook document 14644366), unchanged. Red marks and margin notes check the slides against PPS's own rules (p.6), its Nov 2 capacity model, its April 2026 enrollment and utilization table, the family guides, and 2015-16 enrollment records.

p.19	Hayhurst: "640" is wrong (396; building max 499 in 2015); 525 capacity not reproducible from the page (456-468); 7 vs 4 special-ed rooms	-12
p.33	Seismic: Scenario B is worse than the status quo on 9.0+ buildings; the "reduction" is mostly bond retrofits	-8
p.27	Sitton rated "Ready" at 111% of capacity	-5
p.29	Whitman rated "Ready" at 112% of capacity; 1 vs 4-5 special-ed rooms	-5
p.5	"21 buildings with the highest increase" leaves out Harrison Park, Tubman, Lent, Rieke, Roseway Heights	-4
p.26	Rosa Parks: 3 special-ed rooms counted vs 6-7 needed; capacity cut from 633 to 499 unexplained	-4
p.21	Markham: capacity raised 510 -> 561; Maplewood ISC students into a "Not Yet Ready" building	-3
p.31	Rieke gets seismic money but no readiness profile	-3
p.13 / 16 / 28	Capacity raised since April at Capitol Hill, Duniway, Vestal (over 100% under April figures)	-6
p.17 / 20	George, Hosford: more special-ed rooms than the capacity model sets aside	-4
p.30	"All campuses ADA accessible to the main floor" understates access problems	-2
p.22-29	Hidden leftover text from other slides	-1

Please show your work. The capacity numbers on these slides do not follow from the room counts on the same slides.

PORTLAND
Public Schools

Agenda

- Welcome and Introductions
- Departmental Wins
- School Readiness Assessment Process and Districtwide Findings
- School by School Review
- Confirming Receiving School Readiness
- Next Steps

Departmental Wins

RISE

Bond Program Wins!

- Ida B Wells Land Use Approval received!
- Grice-Adair had 6 CM/GC firm submit proposals which is twice the historical numbers of participants in response to CM/GC.
- All roofing projects are in close-out including Vestal, Chavez, Marshall (phase1) and Woodmere.
- Beverly Cleary Seismic Retrofit in for permit and contractor RFP issued
- Richmond, Ainsworth and Kelly Seismic Retrofit - contractor RFP schedule before mid-Dec

Purpose

Review School Readiness for potential receiving schools from a facilities and operations lens.

Today we will:

a. Review our process for determining facilities readiness

b. Walk through facilities readiness of schools receiving the highest number of students

c. Model scenario A and B. Discuss what a potential seismic plan would look like

Assessing Facilities Readiness Process

- When initially assessing a school's readiness to welcome students we looked at a building's functional capacity, the current utilization rate, and the number of work orders received from each building.

- We utilized our data from our facilities teams, and pulled data from Tririga, which shows the number of classrooms currently being used for what purpose.

- In June, we brought principals in to look at their school's floor plan and provide feedback on how they are using their spaces.

- When scenarios were released, operations teams comprised of facilities, maintenance, RISE, safety and security, nutrition, and transportation did in-person walkthroughs with principals of 21 buildings set to experience the highest number of student increase. 1

-4

1 Not the 21 biggest increases. Missing: Harrison Park +215, Tubman +151, Lent +147, Rieke +117, Roseway Heights +116. Included: Capitol Hill +68, Ockley Green +110. (Peak vs. no-change projection, PPS family guides.)

Functional Capacity: Planning Assumptions

The PPS Utilization Model estimates student capacity using classroom size, space set-asides, and school scheduling needs.

- **Classroom capacity:** Classrooms must be at least 500 sq. ft. Estimated capacity is:
  a. **24 students** for 500–800 sq. ft.;
  b. **27 students** for 801–1,000 sq. ft.;
  c. **30 students** for larger classrooms.
  d. These are planning assumptions, not class-size minimums or maximums.
- **Enrichments and Electives:**
  a. K–5/K–8 calculations exclude gymnasiums and one or two Art/Music rooms, based on enrollment.
  b. Middle/high school calculations use lower utilization assumptions to account for rotating schedules and specialized instructional spaces.
- **Special Education classrooms are intentionally protected:**
  a. Special Education classrooms are set aside from general instructional functional capacity, so they are not assumed to be available for other classroom uses.
  b. Model includes specialized program classroom(s) and Learning Centers (in K-5/K-8).
  c. Classrooms used for students who receive specialized instruction for most of the school day. Capacity in these rooms is 12 students.

***Actual Space Use:** Capacity reflects how spaces could support instruction. Principals determine actual space use (room assignments and any necessary changes).

OK

1 Noted: special-ed rooms count 12 students.

2 Noted: 24 / 27 / 30 per room by size; one art/music room comes out at K-5. We use these rules to check p.19 and p.26.

Special Education

- Continue one Learning Center and two Social Emotional Skills classrooms.
- 1 Sensory or regulation space
- 4 Classrooms Total (6)

-12

1. Wrong. PPS's own capacity model lists Hayhurst at 396 in 2019-20. The 640 adds Odyssey (244), which moved to East Sylvan in 2016. Most ever in this building: 499 in fall 2015.
2. Does not follow from this page. With 15 classrooms + 7 special-ed rooms, the p.6 rules give: 14 rooms after art/music (12 x 27 + 2 x 30 = 384) + 7 x 12 = 84 = 468. Without the Learning Center: 456. Not 525.
3. PPS's model sets aside 3 special-ed rooms here (2 + Learning Center), not 7.
4. 469 = 100-103% of the corrected capacity, not 89%.
5. "Ready"? In 2016 PPS called 499 students here "Over-Crowding" (101.8%) and moved a whole program out.
6. This box says 4 special-ed rooms; the left panel says 7. Which is it?

Campus Readiness Profile

Hosford

Safety & Security

- Fencing/gates

Nutrition Services

- Double ovens, warming cabinet, dishwasher ($80,100)

Transportation

- City review and expansion required. Space available. No notable issues.

Special Education

- Inclusive School Community
- 4 Learning Center Teachers
- 1 Sensory/Regulation Space
- 5 Classrooms Total

-5

1. Was 496 in April.
2. 465 / 419 = 111%.
3. Over capacity at peak, yet rated "Ready." George at 107% is "Not Yet Ready."

Campus Readiness Profile

Vestal

Readiness Status: Ready/ Minor Adjustments

Capacity at a Glance

FUNCTIONAL CAPACITY 1
516 students

PEAK ENROLLMENT
507 students In 2027

LARGEST HISTORIC ENROLLMENT 2
451 students in 2010-2011

CLASSROOM USE

4 SPED classrooms
28 classrooms

Planned Future Investments

None

Readiness for Additional Students

- Urgent improvement:
  - Nutrition Services kitchen additions (see below):
    - $27,000 - completed by Summer 2027
- Needed improvement that does not affect school readiness: None
- Accessibility: 18 Accessible classrooms.
  - First floor accessible
  - Does not have an elevator

Safety & Security

- Fencing
- Additional cameras to cover blind spots

Nutrition Services

- Double ovens ($27,000), would need additional tables

Transportation

- City review and expansion required. On property adjustments required and able to accommodate.

Special Education

- 1.5 Learning Center Teachers
- 2 ISC classrooms
- 4 Classrooms Total

-2

1 Was 465 in April. At 465 the SO7 peak is 109%.

2 Peak SO7 is above the most Vestal has ever had (451).

Campus Readiness Profile

Whitman

Readiness Status: Ready/ Minor Adjustments (2)

Capacity at a Glance

FUNCTIONAL CAPACITY
416 students

PEAK ENROLLMENT
466 students In 2032 (1)

LARGEST HISTORIC ENROLLMENT
475 students in 2001-02

CLASSROOM USE (3)
1 SPED classrooms
23 classrooms

Planned Future Investments
None

Readiness for Additional Students

- Urgent improvement:
  - Nutrition Services kitchen additions (see below):
    - $3,100 - completed by Summer 2027
- Needed improvement that does not affect school readiness: None
- Accessibility: 24 Accessible classrooms.
  - Accessible route to front door is indirect.

Safety & Security
- Fencing
- Additional access controlled doors
- Additional cameras to address blind spots

Nutrition Services
- Warming Cabinet ($3,100)

Transportation
- City review and expansion required. On property adjustments required and able to accommodate.

Special Education
- Inclusive School Community
- 4 Learning Center Teachers when combined with Woodmere
- 1 Regulation/Sens[illegible] Space
- 4-5 Classrooms Total (4)

-5

1. 466 / 416 = 112%.
2. Over capacity at peak, yet rated "Ready."
3. 1 special-ed room counted...
4. ...4-5 needed with Woodmere. Capacity would drop further.

District-Wide ADA Accessibility

- Title II of the Americans with Disabilities Act (ADA) requires state and local governments, including public school districts, to give people with disabilities an equal opportunity to benefit from all of their programs, services, and activities.
- School districts must provide program access by ensuring that students with disabilities are not excluded from programs because existing buildings or facilities are inaccessible to them.
- When school districts build or alter facilities, they must make them accessible to people with disabilities, following ADA standards.
- All PPS campuses are ADA accessible to the main floor. 1

-2

1 Main floor only. Hosford's basement classrooms are "inaccessible or difficult" (p.20); Gray's route is "indirect and difficult" (p.18); many receiving schools have no elevator.

Seismic

Scenario A

Rose City Park & Beach seismic $ - reallocated to:

- Abernethy: (upgrade load bearing URM wall in gym)
- Arleta: (upgrade Building Part A)
- Brentwood: (upgrade Building Part D)
- Duniway: (upgrade URM in D and improve cafeteria)
- Hosford: (upgrade Cafeteria/Building Part B)
- Markham: (upgrade URM walls)
- Rigler: (upgrade URM walls)
- Rieke: (upgrade Building Parts A, B and C)
- Whitman: (upgrade Building Part A)

Scenario B

Beach seismic $ - reallocated to:

- Duniway: (upgrade URM in D and improve cafeteria)
- Rieke: (upgrade Building Parts A, B and C)

*Applying for SRGP grant for Rieke (Building Parts B and C)

-3

Rieke gets seismic money in both scenarios but has no readiness profile, even though it takes 30% of Maplewood plus the Stephens Creek Crossing area and has the highest seismic score of any receiving school (9.6).

Seismic

	District Seismic Risk Score and Projections[1,2]			
	2025 Values[3]	Status Quo Values[4]	Scenario A Values[5]	Scenario B Values[6]
PK-8 Ages	6.59	6.36	6.19	6.21
Full District	5.45	5.30	5.04	5.09

Both scenarios show a ***reduction*** in district wide seismic risk.

[1] District Seismic Risk Score is the average of each building part's seismic risk score, weighted by floor area. Larger buildings count for more.

[2] Buildings at schools not assessed in 2024-25 (new builds or recent retrofits) were assigned placeholder scores: new build=1.5; retrofit RC IV=3; retrofit RC III=4; (RC = risk category). This ensures the District Score does not exclude lower scoring buildings.

[3] Per the 2025 Seismic Risk Assessment

[4] Include score updates for all selected 2025 Bond retrofit projects

[5] Include score updates for 2025 Bond retrofit projects (excluding RCP and Beach) and include proposed projects. Removes closed schools.

[6] Include score updates for 2025 Bond retrofit projects (excluding Beach) and include proposed projects. Removes closed schools.

Seismic

Scenario Impacts on Enrollment at Campuses with Building Parts Rated 9.0+ or URM		Student Count				Normalized Student Count[1] (assumes 25-26 enrollment for consistent comparison)			
		Enrollment 25-26		Enrollment 31-32		Enrollment 25-26		Enrollment 31-32	
		2025 Values[2]	Status Quo[3]	Scenario A[4]	Scenario B[5,6]	2025 Values[2]	Status Quo[3]	Scenario A[4]	Scenario B[5,6]
	Total Enrollment	24,646	24,646	24,541	25,031	24,646	24,646	24,646	24,646
	Campus w/ bldg part > 9.0	11,175	8,249	7,981	8,414	11,175	8,249	8,015	8,285
	Campus w/ URM	7,845	4,837	2,718	3,981	7,845	4,837	2,730	3,920
Percent of total enrollment	Campus w/ bldg part > 9.0	45.3%	33.5%	32.5%	33.6%	45.3%	33.5%	32.5%	33.6%
	Campus w/ URM	31.8%	19.6%	11.1%	15.9%	31.8%	19.6%	11.1%	15.9%
Change from 2025 Values	Campus w/ bldg part > 9.0	-	-2,926	-3,194	-2,761	-	-2,926	-3,160	-2,690
	Campus w/ URM	-	-3,008	-5,127	-3,864	-	-3,008	-5,115	-3,925
Percent Change from 2025 Values	Campus w/ bldg part > 9.0	-	-26.2%	-28.6%	-24.7%	-	-26.2%	-28.3%	-25.9%
	Campus w/ URM	-	-38.3%	-65.4%	-49.3%	-	-38.3%	-65.2%	-50.0%

Both scenarios show a ***reduction*** in the proportion of students attending schools with building parts rated 9.0+ and schools with URM buildings.

[1] Normalized figures hold total enrollment at 2025-26 levels so the scenarios can be compared on a consistent basis. They are for comparison only, not forecasts of actual student counts or student moves.
[2] Per the 2025 Seismic Risk Assessment
[3] Include score updates for all selected 2025 Bond retrofit projects
[4] Include score updates for 2025 Bond retrofit projects (excluding RCP and Beach) and include proposed projects. Removes closed schools.
[5] Include score updates for 2025 Bond retrofit projects (excluding Beach) and include proposed projects. Removes closed schools.
[5] Scenario B enrollment figures were estimated by extrapolating from the Scenario A figures and may be overstated. Treat them as preliminary estimates, not forecasts.

-8

1. Normalized: Scenario B 33.6% vs. status quo 33.5%. B is slightly WORSE than doing nothing.
2. Scenario A improves on doing nothing by 1.0 point (234 students).
3. The "reduction" is measured from 2025. Most of it (-2,926 students) comes from bond retrofits that happen under the status quo too.
4. Left table: Scenario B total (25,031) is larger than status quo (24,646). It compares 2025-26 with 2031-32 enrollment.

Next Steps

- Collaborate with Principals and school teams to refine school-specific implementation plans aligned to each school's transition year.
- Confirm all receiving-school space plans and priority upgrades.
- Finalize transportation, arrival/dismissal, and Safe Routes to School improvements.
- Coordinate moving schedules, technology, equipment, and classroom setup.
- Share school-specific milestones with families and staff, and monitor readiness through opening.
